Dedicated to
the memory of the late
John Desmond Bernal
whose insight into the societal
origins and impact of science
inspired an interest that became a career

and to

Chauncey D. Leake,
Joshua Lederberg,
Robert K. Merton,
and
Derek J. DeSolla Price

whose acumen, criticism, and encouragement
as scientists and friends
envigored and guided the early research
that led to the publication of the
Science Citation Index®
and to its use not only for information retrieval
but also for the social study of science.

Preface

This book is the product of more than ten years' research. As a matter of fact, the concept which it embodies predates my work on citation indexing and the present *Science Citation Index*,® to which I plan to annex the *JCR*™ annually, as I have done here.

The *Science Citation Index* was planned as a 'radically different' tool for information retrieval in the natural sciences. But its methodology was constructed within a framework revealed to me with the pointed casualness but intense clarity of a great teacher. Chauncey Leake's early suggestion that I study the significance and potential usefulness of review articles and their references offered me more than I recognized at the time. Concerned as I was with the problems of information retrieval, I recognized in his suggestion -- reinforced by a fortuitous contact with W.C. Adair -- the beginnings of the *Science Citation Index.*

As, during the years, I and many others used the *SCI*® for its planned and advertised purpose of information retrieval, I came to see that I had been advised not only to consider the meaning and usefulness of references and citations, but advised especially to consider their meaning *in a particular type of journal.* The data bank amassed over the years to produce the *SCI* gave me a unique and unprecedented opportunity to look at references and citations not just as tools for information retrieval, but to look at them also as characteristics of the journals they linked. Using the *SCI* data bank, I began to study journals as socio-scientific phenomena as well as communications media. In that new study I began the manipulations of the data bank and the listings and relistings that have with repetition, study, continual modification and refinement, produced as a partial result the book I offer here.

In the introduction I have tried to explain clearly what the *JCR* is, how it was compiled, how it can be used for some simple purposes for which, I think, it is certainly needed. I have tried also to suggest its usefulness in what I'll call more advanced research. If I have failed in the latter, it is because I have deliberately, and with some difficulty, restrained my own enthusiasm about the value of what some may find at first sight to be merely another handbook of data. Let me say only that the sociology of science is a relatively new field. I believe that *JCR* will prove uniquely useful in exploring it. As students and researchers use the book, I am confident they will discover in that suggestion not a boast, but a fact. And, with great pleasure, I leave to them also to discover how the *JCR* not only answers the simpler questions they at first bring to it, but then begins to help them formulate questions that are more significant. As its author, I've naturally been pleased to find the *JCR* ready with answers. But as a student and researcher myself, the *JCR* satisfies me most because it teems with questions.

A preliminary edition of the *JCR*™ has been available in the form of computer printouts. It was based on a quarter-year sample of 1969 data, and is described in an article from *Science* reprinted in the introduction to this volume. The scope of this present edition, based as it is on the complete 1974 data, will be much more authoritative. It will be much easier to use than the earlier computer printouts. And it will also be easier to copy from. The convenience it offers me and other members of ISI staff will facilitate our preparation of reports of future research based on *JCR* data. Other users elsewhere will profit from that same convenience. I hope they will, when using the data in this volume, or when selectively copying its listings, acknowledge the source with a suitable citation.

The book is not, in this present form, all that I should like it to be. It cannot be as large as it would have to be to give users all the data on particular journals that interest them. It contains errors that have survived the considerable effort that I and others have expended to prevent them. And in the introduction, as I have implied, I doubt that I have adequately explained the scope and potential of the concept it embodies.

I acknowledge these shortcomings without dissatisfaction. I can be threatened with only one disappointment in publication of this book: that subscribers may fail to become, like myself, enthusiastic users and researchers of the *Journal Citation Reports*®. When they do become avid users, I'm sure they will express in reviews (and perhaps in letters to me) a discontent that equals my own about its necessary and its unplanned shortcomings.

I cannot acknowledge suitably, as to either their number or their effort, the help that many others have given towards what is good in this book. The dedication attempts to do so in part. I should like to mention here, however, the special contribution of Dr. Calvin Lee and Mr. Robert Hayne. The ISI programming staff headed by Mr. David Rovinsky provided invaluable support. Mrs. Loretta Carter also deserves mention for her careful handling of the manuscript and tables, as does Mrs. Sarah Downes for her preparation of the introductory photo-typescript.

Comments and criticisms on the work in its present form will be gratefully received.

Introduction

This volume of the 1975 annual cumulation of the *Science Citation Index®* (*SCI®*) adds a new section to the series. The nature and purpose of *Journal Citation Reports®* (*JCR™*) is described in this introduction. The introduction includes a reprint of an article on the background of the *JCR* that will supplement information given here. A selective bibliography on citation analysis and its applications follows the reprint. An *Abbreviated-to-Full Title Dictionary* of citing and cited journals completes the introductory material.

I. Journals, References, and Citations

A citation index is based on the principle that there is some meaningful relationship between one paper and some other that it cites or that cites it, and thus between the work of the two authors or two groups of authors who published the papers.

The entire *SCI®* data base is stored on magnetic tape, and it is thus amenable to extensive manipulation and analysis. In the case of authors, we have been able to identify the frequency with which they and their papers are cited in the literature, over any chosen time period. Counts of this sort are strictly quantitative and objective. But even admitting this limitation, an author's or a paper's frequency of citation has been found to correlate well with professional standing. It is certainly not the *only* measure, nor one that can be used, for any purpose, in isolation. We do not claim for it the absolute reliability that critics of citation analysis have wrongly imputed to us when they have attacked it. The fact does remain, however, that it provides a useful objective criterion previously unavailable.

Basically the same principle can be used in evaluation of journals, rather than of authors' publications or single papers. When a scientist cites a previously published article, he tells us, in a sense, that he has read it and has some reason for bringing it to our attention. The more frequently a journal's articles are cited, the more the world's scientific community implies that it finds the journal to be a carrier of useful information.

Evaluating Journals

It has always been and still remains difficult to assess the relative importance of scientific and technical journals. There have been few, if any, totally objective criteria by which to measure them. Researchers and their library colleagues quickly learn what journals are most 'important' for particular disciplines, and countless studies have been carried out to establish 'core-journal' lists. But as research interest and activity extend beyond the basic discipline, as interdisciplinary and multidisciplinary 'mission-oriented' research requires broader journal coverage, the relevance and usefulness of journals outside the disciplinary core may be difficult to determine. Even within the small disciplinary or departmental library, when a choice between journals is dictated by restricted acquisitions budgets, considerations less relevant than scientific merit may all too likely determine or force the choice--politics, sheer habit, relative subscription cost, and so on.

Thus, the *Journal Citation Reports®* (*JCR™*) extends the use of citation analysis to examine the relationships among journals rather than among articles and their authors. The *JCR* answers these basic questions: how often has a journal been cited? what journals have cited it? how frequently have *particular* journals cited it? does the cited material in the case of a particular journal come primarily from older articles, newer articles, or does the citation pattern show a chronological consistency? what journals has the particular journal itself cited? how often has it cited each of them? is it citing old material, new material? what part of these counts is due to self-citation? In other words: who uses a particular journal? how frequently? for what purposes?

The Total Framework

Like any other tool, the *JCR* cannot be used indiscriminately. It is a source of highly valuable information, but that information must be used within a total framework proper to the decision to be made, the hypothesis to be examined, and rarely in isolation without consideration of other factors, objective and subjective. For example, there are undoubtedly highly useful journals that

are not cited frequently. Scientists read many such journals for the same reason people read newspapers and other non-scientific periodicals--to keep up with what's going on generally. They may rarely cite such journals in their published work. This does not mean that such uncited or infrequently cited journals are any less useful for their intended purpose than cited journals. It does mean, however, that these journals are written and read for a purpose other than the communication of original research findings and the indispensable summary of research findings provided by reviews..

Another consideration is that citation frequency is sometimes--indeed to some extent must be--a function of variables other than scientific merit. Some such variables may be an author's reputation, the controversiality of subject matter, a journal's circulation and its cost, reprint dissemination, its coverage by current-awareness and indexing and abstracting services, society memberships, the availability and extent of libraries' journal collections, national research priorities.

Compiling Journal Data

The *JCR*™ analyzes and summarizes a massive amount of data: the 1974 listings are based on 4,248,065 citations from the references of approximately 400,000 source items published in 1974 issues of some 2400 *SCI* source journals.

Obviously, it will be easier to use information from the *JCR* if one understands how it has been compiled. The user must remember that the *JCR* is a calendar-year report, compiled from the *Science Citation Index*® (*SCI*®) data base.

The *SCI* indicates the reference/citation links between an article published during the year and all previously published articles cited in the current article's references. The *SCI* identifies every unique link between any cited article and all articles that have cited it during the year, supplying authors' names, journal titles, journal volume and page numbers, and year of publication. The *JCR* extracts from each of these unique citation links four pieces of information: two journal titles and two publication years. One of the extracted journal titles is that in which the current citing article was published. The other journal title is that in which the cited article was published. One of the publication years is that in which the current citing article was published. Since the *JCR* is a calendar-year compilation, this year date will be the same in all cases. The other publication year will be the year in which the cited article was published.

In this extraction process many similar links are generated from the millions of different and unique links identified fully in the *SCI.* The *JCR* counts how many of these similar links there now are, and tabulates the results in its two 'detail' listings, first by citing journal and then by cited journal.

Article-to-Article Links

It is important to remember the way these counts have been generated, as described above. They are counts of reference/citation links, not counts of articles, nor of journals *per se.* For example, a 1974 article published in *Journal of the American Chemical Society* may have had 40 references. These 40 references contained, let us say, citations of only 35 *different* articles. The 35 different cited articles appeared in 10 different journals. In other words, the 40 references cited some articles--at the most 5--more than once, and cited each of the ten different journals an average of 4 times. In compiling the *JCR,* it is the number of different article-to-article links that is counted. In this case the *Journal of the American Chemical Society* is credited with 35 unique references. Their 35 citations will be distributed among the 10 different cited journals, each receiving on the average a 'cited' count of 3.5--not 4, and not 1.

Lest this point be passed over as a laboring of the obvious, the user must remain aware that the *JCR* represents only one of several possible descriptions of journal relationships. Others have been suggested above, namely, one based on data *including* duplicate citation links between the same two articles, and another based on data including only *unique journal* links rather than unique article links between the same two articles.

The Ever-Changing River of Journals

Many users will need no reminder that the management of serials, among which are included scientific journals, is one of the thorniest thickets of bibliography and librarianship. Even knowledgeable estimates of the number of extant scientific and technical periodicals vary so widely--by tens of thousands--that the uninitiated cannot be blamed for doubting the competence of those concerned with the problem.

Like a real river, the river of scientific and technical publication is ever-changing. Its elements are complex, its course confusing, but overall the difficulties and problems of serials librarianship in science are a reflection of the strength and force of its river's progress. Journals die but are replaced by others; journals grow, and split into sections (lettered or numbered or subtitled and resubtitled), or into new journals; journals may narrow their interest and merge with other journals under old or new titles; titles change to reflect a reorientation even when splitting and merging is avoided--a few words are added, some dropped, the language of the title itself may change.

This characteristic but vital inconstancy of scientific publication is severely problematic for an effort like the *JCR*™ that seeks to describe journal relationships over periods of time. There is, to be sure, the additional confusion contributed by incorrect or ambiguous citations, by the sometimes truly stultifying virtuosity of title abbreviators, by the 'separateness' of original and translated versions of the same journal, etc. As irritating and time-wasting as such things are, they are nevertheless of relatively minor significance within the total complex framework. Most are amenable to easy solution, given persistence, generous computer time, and the ability to survive seemingly endless deserts of boredom. (One very soon ceases to wonder at the reason behind some probably reasonable researcher's decision to abbreviate in yet another way the title of the *Comptes Rendus* of the French Academy of Sciences.)

When and When Not to Combine Citation Counts

The user is advised in any detailed chronological study to make use of the cross-references in the annually issued *SCI*® *Guide and Journal Lists,* and to consult periodical directories that provide historical and genealogical information about serials, such as Ulrich's or *CASSI.*

Compilation of the *JCR* has, as thoroughly as possible, dealt with these 'minor' problems. Major problems of identification remain, however, and the user and researcher must not expect that they have been solved. Any general attempt to do so would have been misguided and inevitably abortive. We have, thus, in compiling the *JCR* refrained from combining journal counts on the basis of 'lineage', even when it is clearly definable. Except where a title change has been so minor (usually among latter words) that it neither affects the title's position in a catalog listing nor requires additional or different entries, the *JCR* does not combine counts for related journals (replacements, supersedents, continuations, descendants, etc.). Nor does it combine counts for 'sections' of 'the same journal'. *JCR* leaves it to the user to decide whether or not his purpose recommends that counts be combined in such cases.

A particularly well-known example of this problem is that of Soviet journals and their translations. To alert the user, an asterisk after a main entry or subentry abbreviation signals that the journal appears in the *JCR* with counts for both original and translated versions. Unfortunately it would be impractical to attempt anything similar for the hundreds of journals that are lineally or otherwise related to others in these lists. When, for special purposes, counts have been combined, the user is informed, as in the case of the list of 100 most-cited journals shown on page 20.

Caution!

Caution is advisable in comparing journals, especially journals from different disciplines. The journal literature varies in its importance as a means of disseminating information in different fields. Wide citation may be necessary practice in one field, but because of other dissemination in others a redundancy. Citation practices differ from one field to another. The difference may be complicated by a difference in the half-life of journal literature in different fields, as well as the size of the extant citable literature. Rapid obsolescence may characterize one field but not another. Thus, for example, it would be foolish to conclude merely on the basis of citation counts that *Journal of the American Chemical Society* is a 'better' journal than *Annals of Mathematics,* or to hypothesize, without a great deal of study, which serves its own field 'better'.

Other factors must be considered as well. For example, journals that do not use the roman alphabet are not as easily and economically included in the *SCI* data base as those that do. This fact may affect the ranking and citation counts of some Russian and Japanese journals. Or a journal may have published two or three articles that are cited year after year with extraordinary frequency, compared with the 'average' article it has published. Citations of such papers may distort evaluation of the journal unless their records are taken into account.

II. Why the *Journal Citation Reports?*®

In other parts of this introduction I have tried to explain the source of the data in the *JCR*™, to describe how the material has been summarized and displayed in its various sections, and to help the novice use it for the first time. The *JCR* answers the following types of questions immediately: how often has a particular journal been cited? what journals have cited it? how frequently have *particular* journals cited it? is it the older or new material that's being cited? what journals does this journal cite? how often does it cite each of them, etc.?

A merely curious browser, or even students or researchers, may reasonably and bluntly ask *why* these questions should be asked. What is the value of answering these questions? Can it justify a work of the *JCR*'s scope and expense? What is the *rationale* of such questions, beyond an academic itch to know? Who wants or needs the answers? Why is it necessary to compare journals or to determine their importance? Doesn't the mere fact that a journal is published say--with unarguable economic authority--all there is to be said? Aren't journals published because they are important to someone or to some group? Unfortunately life isn't that simple.

This introduction is no place to go into the complicated economics and politics of scientific and technical journal publication. The subject deserves several doctoral theses. In due course, the *JCR* will undoubtedly stimulate students to undertake them. Suffice it to say the 'authoritative' voice of economics can speak in barely more than a whisper. Indeed it can often hardly be heard from its shaky podium of subsidized and unsubsidized society sponsorship, front- and back-door government support, voluntary and mandatory and 'mandatory-voluntary' page-charge systems, advertising and public relations programs, etc. The sheer economic chaos of much of this important activity is alone good enough reason to attempt to answer questions like those posed above.

For that very reason, the *JCR* should quickly prove itself indispensable to people who cannot rely on economic criteria alone in making basic decisions about journals, since the law of supply and demand is not always allowed to prevail. These include administrators in libraries and information service centers; individual scientists; journal editors and publishers; and those who determine science policy and measure its accomplishments.

Librarians can use the *JCR* to counteract the inertia that too often prevails with regard to journal selection. It's just too difficult; therefore, *ad hoc* decisions are rampant. The *JCR* offers objective evidence of the optimum makeup of general and special journal collections. Its yearly editions will indicate or imply changes the library should consider. The chronological spread of citation counts should be invaluable in optimizing retention schedules. Why keep twenty-five years of a journal on your shelves when 80 to 90% of its cited material is less than six years old? Few libraries in the world have a mandate to collect everything and none can afford it. Most must operate within a budget on which users' journal requests can wreak havoc. Because the *JCR* gives good indication of a journal's overall use, it provides a starting point for true cost-benefit analysis in allocating acquisition funds.

Outside the library or information center's administration offices, the *JCR* can be as useful to the librarian as to the library user. At ISI® we have found the *JCR* to be the most reliable--sometimes the only reliable--indicator of a journal's subject area, and of its orientation within the subject area. One quick scan of the columns showing journals that it cites and that cite it can often be more informative than the best title or statement of a journal's editorial objectives. This capability of the *JCR* is especially useful as multidisciplinary work takes scientists to the borders of their own fields, and perhaps over them into others with less familiar journals and journals of different types. These same cited and citing lists reveal what journals in other fields are linking up with journals in their own. And, a far from trivial matter, the *JCR* can be very helpful in deciding

where to publish to reach the audience you want to reach. If, for example, you have a paper that deals with some interesting mathematical aspects of biological problems but is nevertheless definitely a *biological* paper, the *JCR*®can show you which biological journals have the best 'connections' with math, and which are most likely to welcome the paper.

Since publication of the preliminary 1969 edition of the *JCR* we have had many inquiries from journal publishers and editors. Those inquiries seem to me to speak not only for the potential of the *JCR* but also for the managerial acumen of the scientists and business people who expressed immediate interest in *JCR*. As made plain earlier, the *JCR* cannot be used alone in evaluating a journal's performance, but it *can* alone give reliable indication that a thorough evaluation--including use of the *JCR*--may be in order. Has the number of citations dropped in relation to number of articles published? Has the rate of self-citation remained steady at the expected average? How do the self-citing and self-cited rates compare? How are citations distributed among citing journals within and outside the specialty? What is the impact of the average cited article in comparison with other comparably cited journals? How rapidly--see *Immediacy Index* among the *Definitions*--is the journal's material noted in the references of other journals?

The use of the *JCR* can be of far-ranging significance in a field about which I can say least here--science--its planning, its evaluation, its sociology, its history. Citation analysis can be used to identify and map research fronts; to define disciplines and emerging specialties through journal relationships; to determine the interdisciplinary or multidisciplinary character and impact of research programs and projects. I say least about this, to me the most exciting aspect of its potential, because the *JCR* in its present form is, for such advanced applications, only a sketch of that potential, providing little more than suggestions for further and deeper examination of the massive data bank from which its sections have been extracted. I have made plain above my regret that this book has dimensional limits. Even for the generally straightforward lists of ranked and citing and cited journals, we have had to limit the data presented. For the study of science policy and sociology those limitations are more troublesome to me. I believe the *JCR* in its present form can certainly provide material for innovative research in the field. But it will serve the field best if it does, as I hope, prompt more imaginative analyses than I am competent to attempt. I shall be very disappointed if the *JCR* does not, as any good piece of scientific work should, stimulate with every answer it gives more questions that need answers.

Introduction

III. Definitions

These *Definitions* are, in some cases, actually definitions. In others, they explain usages peculiar to the *SCI*® and the *JCR*™ and their editorial conventions. In still others (e.g., *cited journal, citing journal, times cited*), the definition is meant primarily to warn the reader that, in the case of the *JCR*, there is more than initially meets the eye in these apparently obvious terms, and frequently more than the memory instantly discloses. The user will need a fair command of their meaning when reading the descriptions of the *Citing* and *Cited Journal Packages.*

Citation. When one document (B) mentions, or refers to another document (A), the latter (A) has been cited by the former (B) as a source of information, as support for a point of view, as authority for a statement of fact, etc. The word *citation* is used to indicate not only the fact that document A has been cited in a reference of document B, but also for the description of document A contained in the reference (**Lederberg J.** *J. Bact.* **63**:399, 1952). In this sense, citation and reference are frequently used interchangeably.

Citation Index. The *Citation Index* is an alphabetic list, by first author, of items cited in references from footnotes or bibliographies of a source article. Each such citation is followed by a short bibliographic description of the source article which contained the citing reference.

Cited Journal. A journal cited in a reference of an item (source item) published in an *SCI* source journal (citing journal). A cited journal is not necessarily covered by the *SCI*; that is, it may not be found in the listing of *citing journals.* Most cited journals, however, are also citing journals. *Cited journal* is used as a column heading in the *Cited Journal Package* of the *JCR.* Items in that column may include so-called 'soft' journals, and other serial publications. Such entries have been retained for their information value.

Citing Journal. A journal in which published items contained references citing another journal or published item. In the *JCR*, citing journals are necessarily *source journals* of the *SCI.*

Immediacy Index. A measure of how quickly the 'average cited article' in a particular journal is cited. A journal's immediacy index considers citations made during the year in which the cited items were published. Thus, the 1979 immediacy index of Journal X would be calculated by dividing the number of all journals' 1979 citations of items it published in 1979 by the *total number* of source items it published in 1979. It should be obvious that an article published early in the year has a better chance of being cited than one published later in the year. As a result, journals published weekly and monthly will theoretically have an advantage, as regards immediacy, over journals published quarterly and semi-annually.

Impact Factor. A measure of the frequency with which the 'average cited article' in a journal has been cited in a particular year. The *JCR* impact factor is basically a ratio between citations and citable items published. Thus, the 1979 impact factor of journal X would be calculated by dividing the number of all the *SCI* source journals' 1979 citations of articles journal X published in 1977 and 1978 by the *total number* of source items it published in 1977 and 1978. There are other ways of calculating journal impact (see **Garfield E.** Citation analysis as a tool in journal evaluation. *Science* **178**:471-79, 1972; especially note 27).

The impact factor is useful in evaluating the significance of absolute citation frequencies. It tends to discount the advantage of large journals over small ones, of frequently issued journals over less frequently issued ones (weeklies *vs.* quarterlies or annuals); of older journals over newer journals. In each such case the first is likely to produce or have produced a larger citable corpus than the second. All things being equal, the larger that corpus, the more often a

journal will be cited. The impact factor allows some qualification of quantitative data. The qualification is algorithmic and objective, but nonetheless useful in journal evaluation.

Journal Title. The title of a scientific or technical periodical, usually given in the *JCR*™ in an abbreviated form. Abbreviation of titles in the *JCR* usually ignores subtitles and title run-ons (Acta medica clinica--*an international journal of medical practice.* Zeitschrift für Neurologische Forschung *und Angewandte Gebiete*). In abbreviation of journal titles, consistency is subordinated to informativeness and clarity, as far as space allows. In alphabetic listing of journals, abbreviations are alphabetized letter by letter, with a space regarded as a 'letter' preceding *A* and a hyphen as a 'letter' following *Z*. In such alphabetic listings of 'journal titles' in the *JCR*, note that it is the *abbreviation, not the full journal title,* that is alphabetized. An *Abbreviated-to-Full Title* Dictionary begins on page 35.

Reference. The mention or description of one document (A) in another document (B), to indicate a source of information, to provide support for a point of view, to lend authority to some statement of fact, etc. Document B is said to make reference to document A; document A is said to be cited by document B. *Reference* is also used for the document description or bibliographic data given in making the reference (**Lederberg J.** *J. Bact.* **63**:399, 1952). Reference is made, that is, references are given, in footnotes, and more frequently among bibliographic end-notes or in bibliographic listings at the end of an article. From such references are extracted the *citations* which become main-entries in the *Citation Index.*

Rest. A column heading in the *Citing* and *Cited Journal Packages* of the *JCR*, used to mean 'Total Citations of Articles Published in All Previous Years'. Since the format of the *JCR* allows a chronological distribution of citation dates over a ten-year period, *Rest* means 'published prior to the decade just ended'.

Self-Citation. Self-citation of journals occurs when an article in journal X cites another article previously or simultaneously published in journal X. Self-citations are contained in about 20% of a journal's references.

Self-Citation Rate. Self-citations expressed as a percentage of all citations. There are *two* self-citation rates, the self-cit*ing* and self-cit*ed* rates. The self-citing rate relates a journal's self-citation to its total references. The self-cited rate relates a journal's self-citations to the number of times it is cited by all journals including itself. For example journal X made reference to 10000 items, including 2000 items it itself had published. Its self-cit*ing* rate is 2/10 or 20%. On the other hand, journal X was cited 15000 times in the references of all journals, including its own. Its self-cit*ed* rate is 2/15 or 13.3%.

Source Index. The *Source Index* of the *SCI*® gives a complete bibliographic description of all source items processed for the *SCI.* Items are arranged alphabetically by name of first author; all coauthors are cross-referenced to first authors. The *Source Index* is, thus, an alphabetic index by author of all items published by *SCI*-covered journals during a particular year, or during the time covered by any of the cumulations of *SCI* annuals.

Source Item. Called also source document, source article, a source item is an item published in one of the source journals processed for the *Science Citation Index*®(*SCI*). Source items may be original substantive articles, editorials, letters, technical notes, correction notes, meeting reports, reviews, etc. From the references provided by a source item, citations are extracted to prepare the *Citation Index* of the *SCI;* bibliographic descriptions of source items are prepared for the *Source Index* of the *SCI;* and words from the titles of source items are paired for production of the *Permuterm*® *Subject Index* of the *SCI.*

Some types of source items (e.g., news items, non-scientific and non-technical correspondence)

do not by their very nature invite citation in the references of scientific reports. Such source items are excluded from source-item counts in compilation of the *JCR*.™ In the *JCR* only original articles, technical notes and review articles are counted as source items, except in the case of the following journals, whose meeting abstracts are admitted as source items in impact-factor and immediacy-index calculation: *Federation Proceedings, Bulletin of the American Physical Society, Clinical Research, Transactions of the American Nuclear Society,* and *Notices of the American Mathematical Society.*

Source Journal. A journal that is processed for the *SCI,*® so called because it is the source of published items processed for compilation of the three sections of the *SCI.* In the *JCR* a source journal is a *citing* journal.

Times Cited. The *JCR* describes relationships between journals. It is, however, based on citation links between articles. The following explanations of 'times cited' may be unnecessary for most users. Some, however, may need the information, and it is given in some detail in the interest of whatever differentiation research may require.

Times Cited: Authors. In the case of authors, 'times cited' is the sum of the citation of their cited items, as described below, including journal articles, books, etc.

Times Cited: Journals. In the case of journals, 'times cited' is based on citations of articles, as described below. It is a cumulation of the number of times a particular journal has been named in citation of different articles in references of individual source items.

Times Cited: Articles. As elsewhere in these definitions, the term *articles* is used broadly for 'journal items', and includes technical communications, letters to the editor, editorials, etc.; in other words, individual items published in journals. An article cited three times in the references of the same *SCI* source item is counted as having been cited by that source item *once.* Thus, 'times cited' in the case of articles is the cumulative number of times the article has been cited once or more by single *SCI* source items. In the case of articles, therefore, 'times cited' is equivalent to the number of source items that have cited the article.

Times Cited: Books and Other 'Non-Journal' Items. The references of journal items contain citations of many different types of publications. About 80% of the references cite other journal items. The remaining 20% cite books (single- or multi-authored monographs); edited collections of single- or multi-authored 'contributions' or 'chapters' or 'sections'; variously compiled and formatted collations of reports and papers produced by meetings, symposia, congresses; technical reports of academic, industrial, and governmental origin; personal communications; items in press; theses; 'unpublished' reports; collected works of classical and modern authors; handbooks, textbooks, data compilations; encyclopedias and other reference works; etc.

A great deal of such material presents problems for citation analysis that the journal article does not. First, styles of citation vary widely and wildly. Second, internal citation (of a single page, series of pages, section, chapter, etc.) is particularly frequent. Third, different revisions or editions, by the same author(s) or by the same or different editor(s), may be cited.

Such items cited more than once in the references of the same *SCI* source item are taken as cited as many times as there are different forms of citation. Thus, if John Smith's *Classic Chemistry* is cited three times identically as "Smith J. *Classic Chemistry.* New York: ABC Publ., 1954," it is counted as having been cited *once* by the citing article. If, however, the three references contain citations such as (1) "Smith J. *Classic Chemistry,* **1st ed.,** New York: ABC Publ., **1954, p. 25;**" (2) Smith J. *Classic Chemistry,* **1st ed.,** New York: ABC Publ., **1954, p. 86;**" and (3) "Smith J. *Classic Chemistry.* **2nd rev. ed.,** New York: ABC Publ., **1960,**" Smith's 'book' (and Smith) will be taken as having been cited three times. Thus, 'times cited' in the case of such 'non-journal' items is the cumulative sum of their single or multiple citation by individual *SCI* source items.

IV. Components of the *JCR*™

The *JCR* is made up of three data 'packages' or sections. We have retained the word 'packages' in the titles of the sections from their first publication in the form of computer printouts. The three sections are: (1) *Journal Ranking Package;* (2) *Citing Journal Package;* (3) *Cited Journal Package.*

The first section (*Journal Ranking Package*) lists cited journals alphabetically and then ranks them by five different counts or indicators.

The second section (*Citing Journal Package*) shows for each *SCI*® source journal the journals it cited in 1974, and the chronological spread of items cited.

The third section (*Cited Journal Package*) shows for each journal cited by *SCI* journals, the *SCI* source journals that cited it, and the chronological spread of items cited.

Each of these sections is described more fully in the material which follows.

The *Journal Ranking Package*

The first part of the *JCR* is the *Journal Ranking Package.* It contains six listings, described in detail on pages 10-13. The first listing is an alphabetic list of journals cited in the 1974 references of journals processed for the production of the *Science Citation Index*®. The remaining five listings rank the cited journals by various counts and indicators.

The ranking lists present a great deal of useful information. Some of it is a summing of counts of references made and citations received that are broken down by cited journal and by citing journal in the two larger parts of the *JCR.* Some of the information is presented only in these lists; for example, the number of source items published in the years 1972, 1973, and 1974 by each of the cited journals. It can be somewhat difficult initially to understand the calculation of impact factor and immediacy index, as defined in the *Definitions* elsewhere in this introduction. The summing of counts presented in the *Journal Ranking Package* gives the counts involved in the calculation of both, along with the result. Impact factor is the result of dividing the count in the fourth column of figures by the count in the seventh column. Immediacy index is the result of dividing the count in the next-to-last numerical column by the number on its left.

The fact that there are *five* ranking lists will, I hope, serve to remind users that ranking journals by any single criterion can be highly useful. But the result must be used with caution, and not in isolation without consideration of other rankings and other factors which may not be susceptible to any kind of ranking or any kind of objective, especially algorithmic comparison. Not unnecessarily, this advice of due caution is repeated elsewhere in this introduction, and in much else that the author has written on the subject. The user must remember that *rank* in the *JCR* indicates relative standing on certain lists, and that the *JCR* is, among other things, a *tool for* evaluation of journals, not itself an evaluation of journals.

Description

Section 1 is a listing of journals cited in 1974 in the references of *SCI*® source journals. The journals are arranged in alphabetic order of title abbreviation (letter by letter, with space preceding *A* and hyphen following *Z*). The first column is an item number. The second column is the journal-title abbreviation. The next four columns, bracketed under the heading '———Citations in 1974 to———' give:

(1) the total number of times the journal was cited by individual *SCI* source items in 1974;

(2) the portion of those total citations accounted for by articles the journal published in 1973;

(3) the portion of the total citations accounted for by articles the journal published in 1972; and

(4) the sum of 1972 and 1973 items cited in 1974.

The next three columns, bracketed under the heading '———Source Items in———', give

(1) the number of source items published by the journal in 1973;

(2) in 1972; and

(3) in those two years together.

The next column, headed 'Impact Factor' gives a figure for the relative frequency with which the journal's 'average cited article' has been cited. (See *Impact Factor* under *Definitions* above.) Briefly, the impact factor is the ratio of citations to citable items published: all journals' 1974 citations of 1972 and 1973 items published by journal X, divided by the total number of source items published in 1972 and 1973 by journal X.

The next two columns show, respectively, the number of times articles in the journal's 1974 issues were cited in the references of 1974 *SCI*® source items; and the number of source items the journal itself published in 1974. The last column, headed 'Immediacy Index' (see that term under *Definitions* above) is the quotient of 1974 citations divided by 1974 source items.

Thus, we see that *Acta Anaesthetica Scandinavica* was cited by all *SCI* source journals 287 times in 1974. Of those 287 citations, 62 were citations of articles published in 1972 and 1973 issues of *Acta Anaesth. Scand.* In 1973 that journal had published 54 source items; in 1972, it published 48. These 102 items (54 + 48), published by *Acta Anaesth. Scand.* in 1972 and 1973, were cited in part by *SCI* source journals 62 times in 1974, as we have seen. The impact factor is therefore 62/102, or 0.608. In 1974, *Acta Anaesth. Scand.* published 61 articles, to a few of which there were, *during 1974,* 8 references. The immediacy index is thus 8/61 or 0.131.

In some cases, a column will show a zero, a small bullet, or a blank. A zero is always a true zero; a small bullet indicates lack of data; a blank indicates an incalculable figure.

It should be remembered, as noted elsewhere, that the journals variously arranged in the sections of the *Journal Ranking Package* include not only *SCI* source journals themselves, but also other journals they have cited. In most cases, we have been able to supply the information on items published in the period 1972-1974 that is needed to fill out the entry for each cited journal not covered by the *SCI*. Where we have not, a small bullet appears.

There will, naturally, always be actual counts in the first column of these listings. A zero in the second to fourth columns of the '———Citations in 1974 to———' group is a true zero. *Abrasive Engineering,* for example, was cited only once in 1974; that citation was of an article published in some year other than 1972 or 1973, and the three columns for those two years' citations and their sum show zeros. Both impact factor and immediacy indexes are therefore also zero.

Zeros in the second group of columns headed '———Source Items In———' usually indicate that the journal is no longer published or no longer published under that title. A small bullet indicates the few cases in which we have been unable to determine the number of source items. For example, *Acta Crystallographica* was cited 7598 times in 1974. Of those citations, 40 were supposedly citations of articles published by 'Acta Crystallographica' in 1972 and 1973. As the reader may know, however, the former *Acta Crystallographica* had by 1972 split into separate A and B sections. Counts for those new journals immediately follow the entry for the former title. As shown, 'Acta Crystallographica' published nothing in 1972 and 1973, or in 1974, but incomplete citations in 1974 references of some journals failed to identify which of the A or B sections was meant. The original title is still highly cited, but cannot be given either impact factor or immediacy index. Both appear for the A and B sections in the entries below. The journal origin of the 40 incomplete citations can be partially determined by consulting the *Cited Journal Package.*

As an alert for the user, an asterisk follows the abbreviation of journals (usually Russian) which appear in the listings in both original and translated versions.

Description

In Section 1 of the *Journal Ranking Package,* cited journals are listed alphabetically by journal title abbreviation. In Sections 2-6, cited journals are rearranged in descending numerical order of counts or indicators in various columns, as follows:

Section 2. By total citations for all years
Section 3. By impact factor
Section 4. By immediacy index
Section 5. By source items published in 1974
Section 6. By number of 1972 and 1973 citations in the references of 1974 issues of *SCI*® source journals.

In Sections 2-6, the first column is a 'rank' number. In these sections, journals will have the same rank number when they show the same number or value for the count or indicator that has determined the ordering of the entries. After one or more repetitions of a rank number, the next lower rank number is advanced as many times as necessary to compensate for the repetition(s). Thus, in Section 5, B CHEM SOC JAPAN, J APPL CHEM-USSR* , and ZH PRIKL KHIM* all rank *37th* in terms of source items published in 1974. The next journal on the list, J GEOPHYS RES, ranks *40th.*

Once familiar with the *JCR*™ and its potential in journal evaluation, readers will find they want information about particular journals from several or all of the lists in Sections 2-6 of the *Journal Ranking Package.* To find the rank of a particular journal on any of the lists, look it up in the alphabetic list. Determine the count or indicator in the column by which you want the journal ranked, turn to the indicated Section of the *Journal Ranking Package,* and run down the relevant column until you find the journal's count or indicator One can of course work from any one of the Sections to any other in this manner, without beginning with the alphabetic listing in Section 1.

For example, in the alphabetic list of Section 1, *Science* is number 2325 on page 20. From that list, we find that it was cited 47,505 times in 1974. Turning to Section 2, we do not have to go far down the first numerical column to find 47,505; *Science* ranks 7th. Scanning across the row to the impact-factor column, we find a value of 5.412. Turning to Section 3, we scan barely half a page to find 5.412 and *Science,* with an impact factor rank of 48th. Jumping across to the immediacy-index column, we find a value of 1.314. Turning to Section 4, we find *Science* ranks 22nd in immediacy. It published 919 source items in 1974; turning to Section 5, we find it ranked 27th (the same as FIZ TVERD TELA and SOV PHYS SOLID ST*) in this respect. In Section 5, in the fourth numerical column, we find *Science* articles published in 1972 and 1973 were cited 11,781 times in 1974. Turning to Section 6, and starting down the fourth numerical column, we find *Science* ranking fifth.

Erratum

Rather than delay the appearance of the 1975 *Science Citation Index,* of which this volume of *Journal Citation Reports* is a part, we have not fully corrected the results of a compilation error discovered during printing.

During initial sorting of the 1974 citations, those for the journals *Surface Science* and *Surgery* were wrongly 'unified' into one journal with the title *Surface Science.* The error was discovered during production of printer's copy. At that time, the wrongly combined entries were unscrambled to make proper main entries for both journals in both the *Citing Journal Package* and the *Cited Journal Package.* It would, however, have been impractical without delaying appearance of the 1975 *SCI* to correct all the subentries throughout the volume where *Surgery* should appear as a cited or citing journal, and, as a matter of fact, *does* appear with correct counts, but disguised as *Surface Science.*

Fortunately, the two journals involved are of such different character that journals that cite and are cited by the one can rarely be the same as journals that cite and are cited by the other. Therefore, *Surface Science* as a subentry of main-entry journals in the physical sciences means *Surface Science,* but its impact factor to the left of such subentries should read 3.34 instead of 2.44. *Surface Science* as a subentry of main-entry journals in the biological sciences and medicine should read *Surgery,* and its impact factor should read 1.55 in those subentries.

Consequently, item 2404 of Section 1 of the *Journal Ranking Package* is in error. It represents a combination of *Surface Science* and *Surgery.* Thus, in Section 2 of the *Journal Ranking Package. Surface Science* ranks 153 instead of 52, and *Surgery* (for which there is no entry in any section) ranks 112. In Section 3, *Surface Science* ranks 129 in impact, instead of 220; and *Surgery* ranks 426. In section 4, *Surface Science* ranks 64 in immediacy instead of 139; and *Surgery* ranks 425. In Section 5, *Surface Science* ranks 355 in number of 1974 source items, instead of 122; and *Surgery* ranks 321. In Section 6, *Surface Science* ranks 79 in terms of 1974 citations of its 1972-1973 source items instead of 60; and *Surgery* ranks 202.

To the editors of these journals we extend our apologies. We hope that they and you will understand the magnitude of the effort involved in compiling the *JCR,* and the ease with which errors may creep in. We assure readers that every reasonable effort will be made to avoid such errors in future compilations.

The *Citing* and *Cited Journal Packages*

The *Citing and Cited Journal Packages* show citation-frequency relationships between pairs of journals. In the *Citing Journal Package,* one can find what journals a particular journal has cited, and a distribution by year of the publication dates of the cited material. In the *Cited Journal Package* one can find what journals have cited a particular journal, and a distribution by year of the publications dates of the cited material. Specimens with description from both appear on pages 16-19.

Relatively few journals produce most of the references processed for the *Science Citation Index* data base. Similarly, relatively few journals account for most of the citations made in those references. In either case, a list of 1000 journals will encompass well over 70% of the items. Beyond lists of 1000 journals, the 'return' in references and citations becomes progressively smaller as the lists are extended, but that return can be valuable for the information it gives about 'narrow' but important specialties and subspecialties in which journals may be few, publication infrequent, research relatively slow-paced, and so on.

Ratios like the *JCR*'s impact factor and immediacy index do much to compensate for sheer size in 'comparing' one journal in biochemistry with another, for example, or in 'comparing' a biochemistry journal to a palaeontology journal. But even with the help of such indices, we must extend the lists of citing and cited journals well beyond the select but gigantic core if we are to do justice to as many of the 'narrower' fields and subspecialties and border-marches of science as possible.

The *Citing Journal Package* includes entries for each of the 2443 journals covered by the *SCI* in 1974, provided that issues of the journal did appear during the year, or, as in the case of some 'annuals', appeared with 1974 cover dates during the early part of 1975. The *Cited Journal Package* includes entries for more than 2500 journals and other items, some of them obviously not covered by the *SCI.* As noted above, journal references contain citations of other items besides journal articles. As far as possible, citations of non-journal material have been deleted in compiling the *JCR.* Cited subentry items in the *Citing Journal Package* and main entries in the *Cited Journal Package* will, therefore, be *journals* in almost all cases. Since exclusion of non-journal material from these listings has been algorithmic, a non-journal item may appear occasionally as a cited-journal main entry, or as a citing-journal subentry.

It would have been uneconomical to give for every citing journal all the journals it cited, and for every cited journal all the journals that cited it. To do so would have made this volume many times its actual size, but would have added to it in either case mainly long strings of singly cited or citing items under every main entry. To avoid the latter, but at the same time to avoid neglect of journal relationships in 'smaller' and 'narrower' fields, the length of subentry lists has been controlled in both the *Citing Journal Package* and *Cited Journal Package.*

The following algorithm was adopted to control the length of subentry lists. Subentry lists of cited or citing journals are limited to a maximum of 100 items, or to the number of items that account for 75% of the total references or citations. Where either condition would allow listing of items cited or citing less than 6 times in the year, the items are not printed as subentries but are incorporated in the ALL OTHER subentry, the last subentry under each main entry. Disregarding these conditions, at least six subentries in addition to the ALL OTHER subentry *must* be printed, if the main entry journal can supply them.

Complete citing and cited data on all the listed journals are available on magnetic tape for users whose research requires it. Inquiries should be directed to the Research and Corporate Development Division, Institute for Scientific Information, 325 Chestnut Street, Philadelphia, Pa. 19106, USA.

Main entries in the *Citing Journal* and *Cited Journal Packages* are arranged alphabetically by journal title abbreviation. As mentioned elsewhere, consistency in abbreviation of journal title words has been subordinated to informativeness. The same word may not be abbreviated in the same way whenever it occurs. The reader can 'decode' any abbreviations that may leave him in doubt by referring to the *Abbreviated-to-Full Title Dictionary* beginning on page 35.

Description

Citing journals are listed in alphabetical order of their abbreviated title. Thus, in the specimen shown, the entry for *Mathematische Zeitschrift* (MATH Z) comes before the entry for *Mathematika* (MATHEMATIKA). The first line of the entry for each citing journal gives its impact factor, abbreviated title (in most cases), and total number of unique references from articles the journal published in 1974. The total is asterisked. Succeeding columns of the row distribute the reference total by year in which the articles cited in the references were published. The last column includes counts for 1964 and previous years.

Thus, the specimen shows that articles published by *Mathematische Zeitschrift* in 1974 produced 1090 references with unique citations (citations of the same article in a single article's references are counted as one). Twenty-six of the 1090 references contained citations of articles published in 1974, 92 references cited articles published in 1973, 115 references cited articles published in 1972, etc. The last column in the row shows that 432 of the 1090 references contained citations of material published in 1964 and earlier years.

Under the total line for each citing journal are listed the journals cited in the references of the citing journal named in the main-entry line. These cited journals are listed, in descending numerical order, by the frequency of their citation in references of the citing journal named in the main-entry total line. The abbreviated title of each of the sub-entry cited journals is preceded by the impact factor of that journal if it has been possible to determine it. The total citation count for each sub-entry cited journal is shown, and then distributed, as described above, by year of publication of the cited items.

Thus, *Mathematische Zeitschrift* cited itself 151 times in the references of articles it published in 1974. Of those 151 citations, 5 were of articles published in 1974, 24 of articles published in 1973, 18 of articles published in 1972, etc. Thirty-six of the 151 citations were of articles published in 1964 and earlier years. Similarly, *Mathematische Zeitschrift* cited *Mathematische Annalen* (MATH ANN) 60 times in the references of articles it published in 1974. Four of these references contained citations of articles published by *Mathematische Annalen* in 1974, 2 contained citations of articles published by *Mathematische Annalen* in 1973, and so on. The chronological distribution shows that more than half (34/60) of *Mathematische Zeitschrift's* citation of *Mathematische Annalen* was of material published by *Mathematische Annalen* in 1964 and earlier years.

The last sub-entry under each citing journal main-entry summarizes data on journals that were cited less than 6 times in the references of articles published in 1974 by the journal named in the main-entry line. (Exceptions to the 'less-than-six' convention are explained elsewhere). Thus 'all other' journals cited in 1974 references of *Mathematische Zeitschrift* numbered 217, and these unnamed cited journals accounted for 356 articles. The total for 'all other' journals is distributed chronologically, as described above for named cited journals.

This specimen shows that about 40% (432/1090) of the articles cited in 1974 references of *Mathematische Zeitschrift* were published in 1964 and earlier years, that its self-citing rate is 13.8% (151/1090), that language seems to be of little hindrance in mathematical studies (there are English, French, German, Russian, Japanese journals on this cited list), that *Mathematische Zeitschrift* seems inclined to an interest in physical and applied mathematics, and that 42.6% (464/1090) of the articles it cited in 1974 were published in 1969 or thereafter.

Description

Cited journals are listed in alphabetical order of their abbreviated title. Thus, in the specimen above, the entry for *American Journal of Physics* (AM J PHYS) comes before the entry for *American Journal of Physical Anthropology* (AM J PHYS ANTHROPOL). The first line of the entry for each cited journal gives its impact factor, abbreviated title (in most cases), and total citations received in 1974. The total is asterisked. Succeeding columns of the row distribute the citation total by year in which the cited articles were published. The last column includes counts for 1964 and previous years.

Thus, the specimen shows that *American Journal of Physics* (*AJP*) was cited 800 times in 1974 by *SCI*® source journal items. Fourteen of the articles or other items cited in 1974 were published by *AJP* in 1974, 95 in 1973, 104 in 1972, etc. Of the 800 citations, 230 were of articles published by *AJP* in 1964 and early years.

Under the total line for each cited journal are listed the journals in whose references citations of the main-entry cited journal appeared. These citing journals are listed, in descending numerical order, by the number of citations each contributed to the citation totals for the cited journal named in the main-entry total line. The abbreviation for each of the sub-entry citing journals is preceded by the impact factor of that journal, if it has been possible to determine it. The total citation count for each sub-entry citing journal is shown, and then distributed, as described above, by year of publication of cited *AJP* items.

Thus, *American Journal of Physics* (*AJP*) cited itself 243 times in references of articles it published in 1974. Seven of those references contained citations of articles published by *AJP* in 1974; 60 of the 1974 references cited 1973 *AJP* articles, and so on. Similarly, *Journal of Chemical Physics* (J CHEM PHYS) cited *AJP* 29 times in references of articles it published in 1974. None of those 29 references cited 1974 *AJP* articles. Of the 29 references from *Journal of Chemical Physics* in 1974 that cited *AJP*, 1 cited a 1973 *AJP* article, 4 cited 1972 *AJP* articles, 2 cited 1971 *AJP* articles, etc. In eight cases, *Journal of Chemical Physics* cited articles that had been published in *AJP* in 1964 or earlier years.

The last sub-entry under each cited journal main-entry summarizes data on journals whose 1974 references included fewer than 6 citations of *AJP* in 1974. (Exceptions to the 'less-than-six' convention are explained elsewhere.) Thus, 'all other' journals whose 1974 references contained citations of *AJP* numbered 153. These 153 journals contained in all 262 citations of *AJP* articles in their references. The total for these 'all other' journals is distributed chronologically, as described for named citing journals.

This specimen shows that *AJP* has a self-cited rate of 30.4% (243/800); that 28.8% (230/800) of 1974 citations of the *AJP* were citations of older material published in 1964 and earlier years; that *Science* in 1974 cited *AJP* as often as *Solid State Communications* cited *AJP*, and interestingly enough, that *Science* cited newer *AJP* material, while *Solid State Communications* cited older material.

The specimen below opposite shows several features whose significance users will soon understand at a glance. BIOCHEM PHYSIOL VISU was cited only twice and the cited items are from the same year. The cited work is *Biochemistry and Physiology of Visual Pigments*, a symposium product published in 1973. When all citations, as in this case, are confined to the same year, the cited item is likely to be a 'soft' journal, as in this case, or as mentioned elsewhere a book of some type. Where citations are confined to two or three years, each separated by a lapse of several years, the cited items are likely to be successive reports from irregularly held symposia, conferences, etc., or successive editions of a book.

BIOCHEM SOC TRANS was cited only 502 times. The journal is *Biochemical Society Transactions*, which began publication in 1973--hence the zeros in most of the right-hand columns. The seven citations for 1972 items are the result of incorrect references. The array of zeros on the right alerts the user to the fact that the journal is relatively new. As a matter of fact, it replaces a proceedings section formerly included in *Biochemical Journal*.

BIOCHEM Z was cited 2420 times. It shows no impact factor, and practically no counts for cited items published after 1966. In fact 84% (2038/2420) of the citations refer to items published before 1965. *Biochemische Zeitschrift* ceased publication with issue number 5 of volume 346 in January 1967. It was superseded by *European Journal of Biochemistry*. The ten counts for cited items published after 1967 are the result of incorrect references.

The 100 Most Highly Cited Journals in 1974

The journals are listed in descending numerical order of the total citations in references of source journals processed by the *SCI* in 1974. An italicized title indicates (1) that citation counts for separately published or sub-titled sections or parts of a journal have been combined to make the total given here; (2) that changes of title have been ignored and counts combined; or (3) that counts for an original and its translated version have been combined. In the listing below A = rank, B = total times cited in 1974, C = impact factor, D = journal title (abbreviation).

SCIENCE

Citation Analysis as a Tool in Journal Evaluation

Journals can be ranked by frequency and impact of citations for science policy studies.

Eugene Garfield

As a communications system, the network of journals that play a paramount role in the exchange of scientific and technical information is little understood. Periodically since 1927, when Gross and Gross published their study (*1*) of references in 1 year's issues of the *Journal of the American Chemical Society*, pieces of the network have been illuminated by the work of Bradford (*2*), Allen (*3*), Gross and Woodford (*4*), Hooker (*5*), Henkle (*6*), Fussler (*7*), Brown (*8*), and others (*9*). Nevertheless, there is still no map of the journal network as a whole. To date, studies of the network and of the interrelation of its components have been limited in the number of journals, the areas of scientific study, and the periods of time their authors were able to consider. Such shortcomings have not been due to any lack of purpose, insight, or energy on the part of investigators, but to the practical difficulty of compiling and manipulating manually the enormous amount of necessary data.

A solution to this problem of data is available in the data base used to produce the *Science Citation Index* (SCI) (*10*). The coverage of the SCI is international and multidisciplinary; it has grown from 600 journals in 1964 to 2400 journals in 1972, and now includes the world's most important scientific and technical journals in most disciplines. The SCI is published quarterly and is cumulated annually and quinquennially, but the data base from which the volumes are compiled is maintained on magnetic tape and is updated weekly. At the end of 1971, this data base contained more than 27 million references to about 10 million different published items. These references appeared over the past decade in the footnotes and bibliographies of more than 2 million journal articles, communications, letters, and so on. The data base is, thus, not only multidisciplinary, it covers a substantial period of time and, being in machine-readable form, is amenable to extensive manipulation by computer.

In 1971, the Institute for Scientific Information (ISI) decided to undertake a systematic analysis of journal citation patterns across the whole of science and technology. It began by extracting from the data base all references published during the last quarter of 1969 in the 2200 journals then covered by the SCI. The resultant sample was about 1 million citations of journals, books, reports, theses, and so forth. To test whether this 3-month sample was representative of the year as a whole, it was matched against another sample made by selecting every 27th reference from the approximately 4 million references collected over the entire year. The two samples were similar enough in scope (number of different items cited) and detail (relative frequency of their citation by different journals) to convince us that the 3-month data constitute a valid sample.

With this data from the last quarter of 1969, ISI produced three listings that should greatly further efforts to map the network of journal information transfer. The first listing is a cumulation of all citations of the same titles. It gives the number of times each different title was cited during the last quarter of 1969 and distributes that total over the years in which cited issues, editions, and so on were published. This distribution is shown by year from 1969 back to 1960 and in aggregate form for earlier years (*11*). Sample items from this listing are shown in Fig. 1.

The second listing is a detailed citation history of each cited title. It shows how frequently each title was cited and, as above, gives subtotals by year of publication. These citation totals and subtotals are further broken down to show how frequently each journal covered by SCI cited the title in question and the distribution by year of publication of cited items. A portion of this listing is shown in Fig. 2.

The third listing is similar to the second, but it arranges the data by citing journal rather than by cited title. The listing shows, for each journal covered by the SCI, the number of references published in issues processed for the SCI during the last quarter of 1969, and it breaks that total down by publication date of the items to which reference was made. The listing further identifies all titles cited in those references and the frequency with which they are cited. As in Fig. 2, the counts for each cited title are broken down by year of publication. A portion of this listing is shown in Fig. 3.

These listings afford, I believe, a new view of the literature in scientific and technical journals. Before discussing some of its implications, however, I note possible limitations of the data and problems encountered in analyzing the sample.

The SCI data base is, to my knowledge, the largest and most extensive of its kind. It does not, however, cover every scientific and technical journal. (Nor, as seems likely in view of findings discussed later in this article, need it attempt to.) The list of most frequently cited journals (the first 152 of these journals are given in Fig. 4) shows that the SCI has been remarkably successful in covering all "significant" and "important" journals, insofar as citation counts can be considered a reliable measure of "importance" and "significance." It is, of course, possible that one or more journals not covered by the SCI, and thus not represented in the data here, may cite themselves and other journals so frequently that their inclusion would alter their own and other journals' rankings. Such may be the case, for example, with certain journals

The author is president of the Institute for Scientific Information, Philadelphia, Pennsylvania 19106.

Fig. 1. Journal citation frequencies. The data show the total number of times each journal was cited during the last quarter of 1969 and the distribution by publication date of the particular issues cited. The journals shown were taken from a list of more than 20,000 items (journals, books, reports, theses, and so on) cited during the last quarter of 1969 in journals covered by the SCI.

in foreign languages, particularly those that do not use the Roman alphabet. As is true of most secondary services, the SCI is less likely to cover a journal that presents problems of transliteration (or transcription) and translation than one that does not. It may be, therefore, that this fact has adversely influenced the ranking of Russian and Japanese journals, for example, which probably cite other Russian and Japanese journals more frequently than do journals in other languages. Whether such an underrepresentation exists, and, if so, to what extent, is difficult to determine. Nevertheless, Soviet information scientists have reported that the SCI does a surprisingly good job of covering Soviet journals. In fact, Soviet scientists seem to have made more use of citation analysis in studies of science policy than have any other scientists (*12–14*).

One must remember that the listings were prepared from a 3-month sample of journal issues. The size of the sample is certainly more than adequate for statistical purposes, and, as noted, the sample has been matched against another sample of more than adequate size. It is nevertheless possible that random events in journal publishing have introduced some degree of distortion. For example, a journal may have, in the time period covered by the sample, departed from its usual policy of accepting only original research communications and published one or two review articles with extensive bibliographies. In the sample, that journal would appear to cite other publications more widely and more frequently than it actually does on the average. Or, a journal may have published an article that has since been cited with extraordinary frequency (*15*). In such a case, a single article will have had an inordinate influence on the ranking of the journal (*16*). Finally, a journal that publishes relatively few articles, but articles of high quality that both cite and are cited frequently, may seem to have considerably less impact than it actually does, particularly if the journal appears infrequently or irregularly and thus escapes representative inclusion in a sample of this type.

In analysis of the sample, an immensely irksome problem was the inconsistency with which different authors and editors abbreviate journal titles in their references. As far as possible, this inconsistency has been minimized by standardizing all variants of the same titles and their abbreviations. Some idea of the work involved in this standardization can be had from the fact that there were more than 100,000 different abbreviations for the 12,000 individual journal titles cited in the 3-month sample (*17*). Inconsistency was made worse by inaccuracy. In some cases, it was possible to disentangle the results of bibliographic carelessness—as, for example, when *Sol. St. Phys.* proved to have been used indiscriminately to identify *Solid State Physics* (Academic Press); *Solid State Physics, Proceedings of the Physical Society, London; Soviet Physics Solid State* (a cover-to-cover translation of *Fizika Tverdogo Tela*); and even *Physica Status Solidi* (Akademie-Verlag). In other cases, however, it was impossible, without going to inordinate expense, to determine exactly which journal was being cited—for example, when *Ann. Phys.* was found to have been used for *Annalen der Physik, Annals of Physics*, and *Annales de Physique*. It is not surprising that the editors of at least one publishing house, having decided that the problem of unique and unambiguous journal title abbreviations is simply insoluble, now use full titles in every reference to a journal.

Fig. 2. Statistics on cited journals. The data on cited journals show the total number of times each journal was cited in the last quarter of 1969 and the distribution by publication date of cited issues. For each cited journal, the figure identifies all other journals ("citing journals") that referred to it five times or more during the quarter year (and the distribution of these citations by publication date of cited issues). Journals that referred to the cited journal less than five times are grouped as "all other." The data were taken from a complete list of journals cited during the last quarter of 1969 in journals covered by the SCI.

Finally, it was necessary to make some arbitrary decisions in order to avoid unduly complex bibliographical technicalities. Journals merge; they split into new journals, or into "sections" that may be published separately or together. They change titles, with or without continuing their numbering of volumes and issues. Some journals appear in one or more translations; some such translations are complete, others selective, and some are similarly, others differently, numbered. Supplements outside a regularly enumerated series must be accounted for. In a few cases, journals periodically change their titles on single issues to note special subject matter (*18*). Serials librarianship abounds in difficulties of this type, and there is frequently disagreement on how best to handle them. Briefly: a journal published in sections is considered a single journal; translations of journals are identified with the original versions; changes of title have been ignored and previous volumes attributed to the current title; journals absorbed or incorporated by other journals have been credited to a new or remaining title; supplements have been considered as issues in the regular series. For the purposes of this analysis, such arbitrary decisions seem justified; as required in the future, the raw citation data can, of course, be compiled and manipulated in such a way as to differentiate between changed titles, sections, translations, and so forth.

Some Preliminary Analyses

Figure 4 shows the result of a familiar application of citation analysis. It is a listing of journal titles ranked by the frequency with which they were cited in the references of journals indexed for SCI. This partial listing gives the top 152 of the 565 most frequently cited journals of science and technology. (The top 152 account for 50 percent of all references to journals.)

It is apparent, even from the makeup of this partial listing, that a good multidisciplinary journal collection need contain no more than a few hundred titles. That is not to say that larger collections cannot be justified, but it does say something indisputable, in terms of cost and benefit, about how large a journal collection need be (or how small it can be) if it is to provide effective coverage of the literature most used by research scientists.

It is also immediately apparent that the majority of all references cite relatively few journals. Figure 5, which plots the distribution of citations among cited journals, shows that only 25 journals (little more than 1 percent of SCI coverage) are cited in 24 percent of all references; that only 152 journals (those listed in Fig. 4) are cited in 50 percent of all references; that only 767 journals are cited in 75 percent of all references; and that only 2000 or so journals are cited in 85 percent of all references. In addition, the data from which Fig. 5 was plotted show that only 540 journals are cited 1000 or more times a year, and that only 968 journals are cited even 400 times a year. When one considers that only 165 or so journals publish 400 or more papers a year, the impact of the average paper must be recognized as relatively slight. In fact, the average paper is cited only 1.7 times a year (*19*).

This analysis gives good reason for concern about any increase in the number of scientific and technical journals. It is not merely that increased numbers of journals make coverage of the literature more difficult, but that so many journals now being published seem to play only a marginal role, if any, in the effective transfer of scientific information. If one accepts the contention (highly debatable, in my opinion) that there are between 50,000 and 100,000 scientific and technical "journals," the data presented here indicate that only 5 to 6 percent of them are being cited. If such percentages seem unrealistically low, it may be because the estimate of 50,000 to 100,000 scientific and technical journals (requiring indexing and abstracting for "total coverage" of the literature) is itself as unrealistic as information scientists have for some time suspected it must be (*20*). Meaningful discussion of this point—the best of current serials catalogs notwithstanding—is probably impossible in the absence of agreement on what, quantitatively as well as qualitatively, constitutes a "scientific journal." At the very least, it may be advisable to distinguish as journals only those periodicals that publish, for example, 20 or more articles a year.

The predominance of a small group of journals in the citation network has been confirmed by a weekly scanning of SCI input to a system for selective dissemination of information (SDI) (*21*). In this SDI system, a newly published article can be retrieved on the basis of journals cited in the article's bibliography or footnotes. This retrieval criterion is known in an SDI profile as a "cited-journal question." A retrieval profile consisting of only 25 different cited-journal questions will retrieve 50 percent of all articles processed for the SCI every week. In other words, half of all articles published cite at least one of the 25 most frequently cited journals at least once.

It is also interesting that a small group of journals is found to be predominant when the literature is analyzed in other ways. Figure 6, for ex-

Fig. 4. The 152 most frequently cited journals ranked by frequency of citation in journals covered by the SCI. Column 1 gives rank, and column 2 gives abbreviations of the titles of cited journals. Column 3 shows the total number of times each journal was cited during the last quarter of 1969. Column 4 gives an estimate of the total number of citations in 1969 of items published in 1967 and 1968 (the estimate was made by quadrupling the 1969 citations of 1967 and 1968 items in the 3-month sample). Column 5 shows the total number of items processed from each journal by the SCI during 1967 and 1968. Column 6 indicates the impact factor (average citations per published item) derived by dividing the numbers in column 4 by those in column 5.

(The reader may be interested in comparing the order of journals in this figure with that in the list for 1974 on page 20 of this volume.)

ample, plots numbers of articles published against numbers of journals. It shows that, of the 2200 journals covered by the SCI in 1969, about 500 published about 70 percent of all articles published. As shown in Fig. 7, a small group of 250 journals provided almost half of the 3.85 million references processed for the SCI in 1969. The predominance of cores of journals is ubiquitous. An analysis of what journals first published reports of newly synthesized compounds indexed for *Current Abstracts of Chemistry and Index Chemicus* gives a similar result: of the 183 journals indexed by this publication in 1969, 11 percent of the journals accounted for 60 percent of the new compounds, 22 percent of the journals for 79 percent of the compounds, 32 percent of the journals for 89 percent of the compounds, and so on (*22*). *Chemical Abstracts* presents an even more striking example of this predominance: about 8 percent of the journals it covers publish more than 75 percent of the items it abstracts (*23*).

The data reported here demonstrate the predominance of a small group of journals in the citation network. Indeed, the evidence seems so conclusive that I can with confidence generalize Bradford's bibliographical law concerning the concentration and dispersion of the literature of individual disciplines and specialties (*2*). Going beyond Bradford's studies, I can say that a combination of the literature of individual disciplines and specialties produces a multidisciplinary core for all of science comprising no more than 1000 journals. The essential multidisciplinary core could, indeed, be made up of as few as 500 journals if, for example, one is attempting to satisfy the needs of libraries in developing countries.

Other Considerations

Citation frequency reflects a journal's value and the use made of it, but there are undoubtedly highly useful journals that are not cited frequently. Scientists read some journals for the same reason people read newspapers—to keep up with what's going on generally—and they may rarely or never cite such journals in their published work (*24*). A popular review journal such as *Scientific American* or a news-oriented journal such as *New Scientist* may rank relatively low on a times-cited list (in

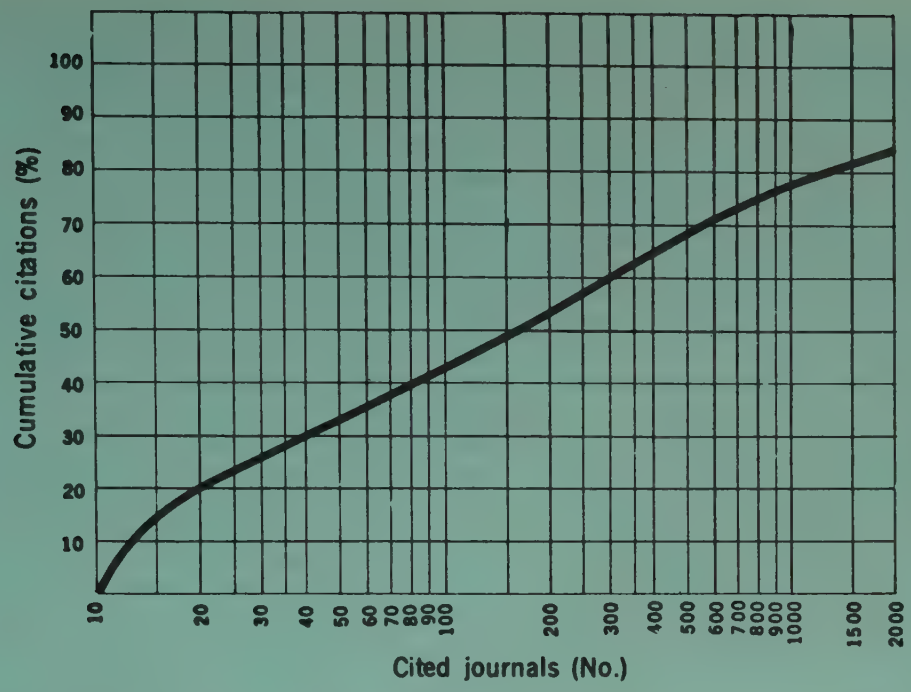

Fig. 5. Distribution of citations among cited journals. The curve shows that a relatively small core of 152 journals accounts for about half of all citations and that only 2000 or so journals account for about 84 percent of all citations.

fact, *Scientific American* is 449th, while *New Scientist* ranks well below 1000), but that does not mean that they are therefore less important or less widely used than journals that are cited more frequently. It merely means that they are written and read primarily for some purpose other than the communication of original research findings.

Citation frequency is, of course, a function of many variables besides scientific merit. Some of them are known or can reasonably be assumed: an author's reputation, controversiality of subject matter, circulation, availability and extent of library holdings, reprint dissemination, coverage by secondary services, priority in allocation of research funds, and others. It is extremely difficult, even when possible, to clarify the relations among such variables and their relative impact on citation frequency. One such variable is, however, fairly obvious. If every article has an equal likelihood of being cited, it should follow that the more articles a journal publishes, the more frequently the journal will be cited. For the most part, the data show that such is indeed the case. Although many articles are never cited (*25, 26*), I have very rarely found among the 1000 most frequently cited journals one that is not also among the 1000 journals that are most productive in terms of articles published. Citation frequency of a journal is thus a function not only of the scientific significance of the material it publishes (as reflected by citation), but also of the amount of material it publishes.

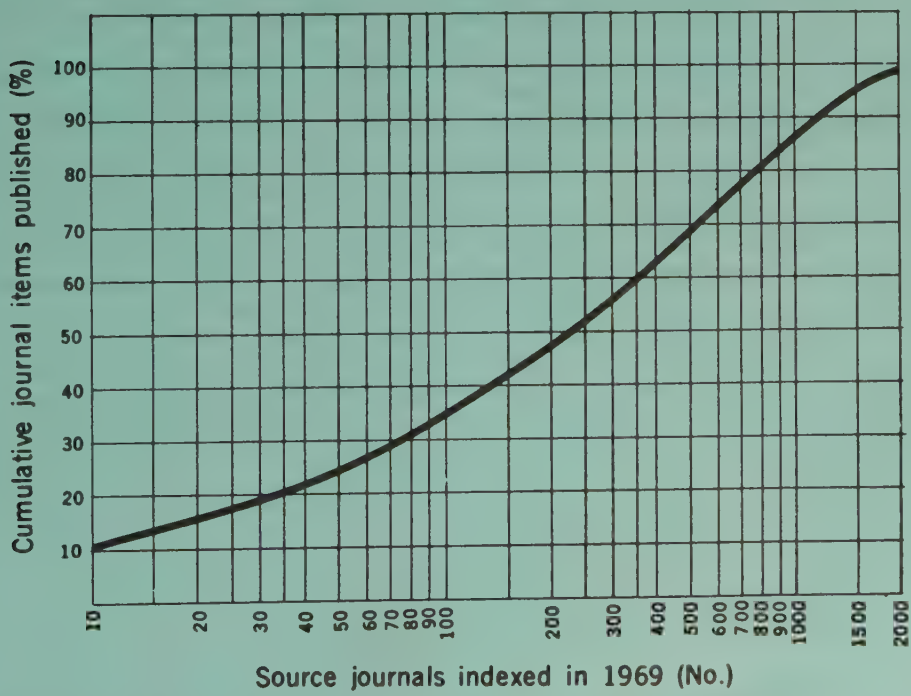

Fig. 6. Distribution of the number of published items among the approximately 2200 journals covered by the SCI in 1969. The curve shows that a relatively small core of journals carried the majority of items published.

In view of the relation between size and citation frequency, it would seem desirable to discount the effect of size when using citation data to assess a journal's importance. We have attempted to do this by calculating a relative impact factor—that is, by dividing the number of times a journal has been cited by the number of articles it has published during some specific period of time. The journal impact factor will thus reflect an average citation rate per published article (*27*). However, the development of impact factors that fairly relate the size of a journal during the cited years to its current citation rate is a formidable challenge to statistical analysis. With the SCI data base, it is easy to determine how frequently a journal has been cited within a given period of time, but it is much more difficult to agree on a total-items-published base to which such citation counts can properly be related because the items may have been published at any point in the journal's history. In selecting an items-published base (*28*) for each journal, I have been guided by the chronological distribution of cited items in each annual edition of the SCI (*19*, p. 15; *29*). An analysis of this distribution has shown that the typical cited article is most heavily cited during the 2 years after its year of publication. (In any given year, 21 to 25 percent of all references cite articles that are 3 or fewer years old.) Therefore, since my sample consists of references made in 1969, I have taken as the items-published base for each journal the number of items it published during 1967 and 1968. To calculate an impact factor for each journal, I divided the number of times 1967 and

1968 articles were cited in 1969 by the number of articles published in 1967 and 1968. Martyn and Gilchrist used a similar method in ranking British journals in an analysis of 1965 SCI data (*30*).

Figure 8 shows the top 152 of the 565 most frequently cited journals ranked by impact factor. Many of the 152 journals do not appear on this high-impact list; in fact, only 75 journals are common to both lists. It will be interesting to observe further changes in the ranking of the most frequently cited journals as calculations of impact factor are extended to 1000 journals and eventually to the approximately 2400 journals now covered by the SCI.

Some Applications

The results of this type of citation analysis would appear to be of great potential value in the management of library journal collections. Measures of citation frequency and impact factor should be helpful in determining the optimum makeup of both special and general collections. Analysis of the chronological distribution of items cited can serve as a guide in determining the optimum size of back files, and, since the data give a detailed view of each journal's citation history, binding and retention schedules can be rationally established journal by journal, rather than for groups of journals (*31*). Another application, which harried librarians may welcome, is the correlation of data on citation frequency and impact with subscription costs. Such a correlation can provide a solid basis for cost-benefit analysis in the management of subscription budgets.

Individual scientists also face the problem of selecting journals to read and keep, as well as compiling reference and reading lists for themselves and their students. Although each of the relatively few journals that are very useful in a given discipline or specialty may be well known, it can be difficult to gauge the merits of the other journals in that discipline or specialty and to decide what journals to get and how long to keep them. It should be noted, in this connection, that analyses of citation frequency and impact factor can be tailored to the specific interests and requirements of individuals by restricting the number of citing journals to a small group of familiar titles. Thus, with a list of the ten or so most frequently cited chemical journals (or merely ten journals favored by a particular chemist), one can, by constructing lists of citation frequency and impact factor, gradually augment the small group and the citation data base with journals of demonstrable relevance. I am using this technique to establish a list of journals for the projected *Social Sciences Citation Index*.

Editors and editorial boards of scientific and technical journals may also find citation analysis helpful. As it is, those who formulate editorial policies have few objective and timely measures of their success. A wrong policy, or a policy wrongly implemented, may have serious effects on revenue and prestige, and the work of regaining readers and reputation can be difficult and expensive. Editors can find useful indicators of a journal's performance in the extent of self-citation, the number of times cited per year, and the distribution of citations among citing journals within and outside the specialty literature.

Perhaps the most important application of citation analysis is in studies of science policy and research evaluation. Price has shown how citation data can be used to identify research fronts (*25*). Soviet information scientists are using citation data to evaluate the implementation of science policy in the U.S.S.R. (*12, 14, 32*), and the sociological studies of Hagstrom and others (*33*) give convincing evidence of the utility of this approach.

Unanswered Questions

The data reported here suggest many avenues for further study. What, for example, is the significance of an abnormally high self-citation rate? Is it characteristic of parochialism, eccentricity, mediocrity? Does it indicate that a particular field of study has as yet no basis for interaction with other fields? Which is true in a particular case and how does one go about finding out?

What is the significance of a wide, multidisciplinary spread of titles cited in the references of a given journal or group of journals? Is it a measure of multidisciplinary activity? If so, is it a valid enough measure to warrant applying the Weinberg criterion (*34*) of multidisciplinary impact in order to determine the amount of government support merited by particular areas of research? Does the fact that *Ecology*, for example, cites more than 500 different journals in a total of 1000 references make it more multidisciplinary than the *Journal of the American Chemical Society*, which cites only twice as many journals in ten times the number of references, or than *Physical Review*, which cites only 600 or so journals in 15,000 references? Does the nonlinearity of publication and citation distributions among citing and cited journals confirm beyond doubt only that relatively few journals are primary nodes

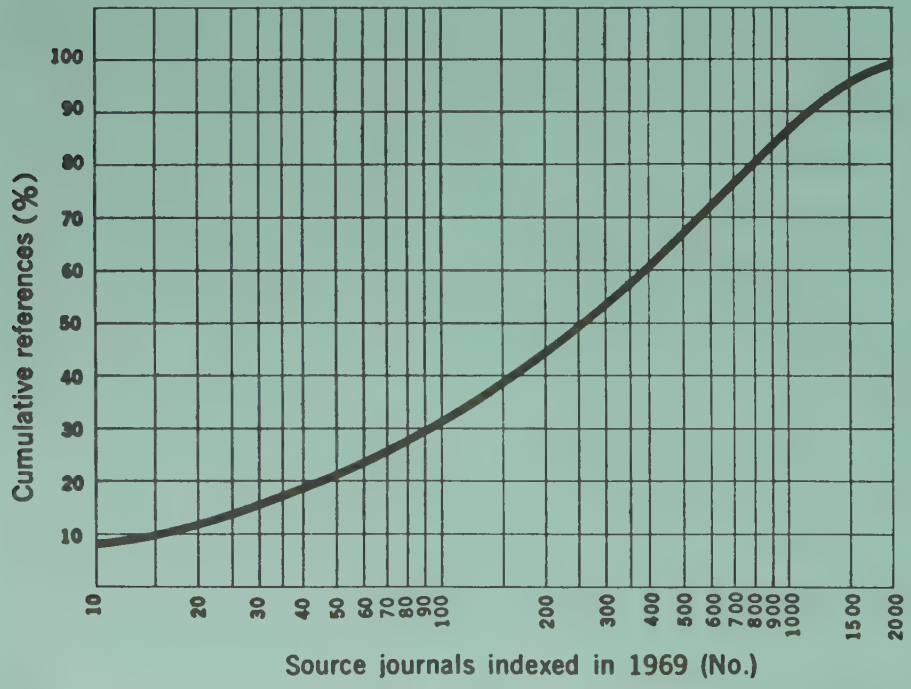

Fig. 7. Distribution of references among journals covered by the SCI in 1969. The curve shows that fewer than 300 journals provided more than half of the references processed.

Fig. 8. The 152 most frequently cited journals ranked by impact factor (average number of citations per item published). The column headings are explained in the legend of Fig. 4.

* There was an error in the numbers given in cols. 5 and 6 of this figure for *Accounts Chem Res* when this article was originally published in *Science*. The error has been corrected in this reprint.

in the communications network, or does it have some other significance?

And what is the significance of a wide disparity between the number of journals cited by a given journal and the number that cite it? *Ecology* cites 500 or so journals but, in turn, is cited by only 115. What does this say, other than the obvious, about ecology and *Ecology*? Is the applicability of work done in ecology and being reported in *Ecology* much narrower than the interests of ecologists?

Several investigators of problems in science policy and science management are already using the SCI data base to explore such questions and many others. Each is trying, for different reasons, to build a model of the journal communication network that will provide more functional definitions of disciplines and specialties, that will make it possible to define in detail how different fields of knowledge interact, that will provide methods of predicting interdisciplinary impact, and that will perhaps provide more effective ways of monitoring research performance. Using the SCI data base to map the journal communications network may contribute to more efficient science.

15. A list of articles that have been cited very frequently has been published: E. Garfield, "Citation indexing, historio-bibliography, and the sociology of science." In: *Proceedings of the Third International Congress of Medical Librarianship, Amsterdam, 5-7 May 1969*, (Excerpta Medica, Amsterdam, 1970), p. 187-204.
16. For example, in 1951 the *Journal of Biological Chemistry* (*JBC*) published an article by O. H. Lowry *et al.* on protein analysis: O. H. Lowry, N. J. Rosebrough, A. L. Farr, and R. J. Randall, Protein measurement with the folin phenol reagent. *J. Biol. Chem.* **193**, 265 (1951). That article represents only 0.7% of the *JBC*'s average quarterly output, but it accounts for 5% of all citations of the *JBC* in our quarter-year sample. Lowry's article is not as atypical of articles from *JBC* as it is atypical of all articles. Of the 50 articles most cited in 1967, 13 (26%) had appeared in *JBC*.
17. The largest number of variants of the same journal title and its abbreviations was 42, the total reached in the case of *Comptes Rendus Hebdomadaires des Seances de l'Academie des Sciences*.
18. For example, the *South African Journal of Obstetrics and Gynaecology*, the *South African Journal of Nutrition*, the *South African Journal of Radiology*, and others are composed of specially titled (and color-coded) issues from the regularly numbered series of the *South African Medical Journal*.
19. *Science Citation Index 1970 Guide & Journal Lists* (Institute for Scientific Information, Philadelphia, 1971), p. 14. For the years 1964 to 1970, the number of citations per year per cited item has been, respectively, 1.60, 1.65, 1.65, 1.66, 1.67, 1.67, and 1.73.
20. E. Garfield, The mystery of the transposed journal lists; wherein Bradford's law of scattering is generalized according to Garfield's law of concentration. *Current Contents* No. 31, p. 5 (August 4, 1971).

23. J. L. Wood, "The parameters of document acquisition at Chemical Abstracts Service," paper presented at the American University Eighth Annual Institute of Information Storage and Retrieval, Washington, D.C., 14–17 February 1966.
24. C. Scott, The science of science; what scientists read and why. *Discovery* (March 1969), p. 110.
25. D. J. D. Price, Networks of scientific papers. *Science* **149**, 510 (1965).
26. ———, Citation practice. *Aslib Proc.* **21**, 328 (1969).
27. The impact factor discussed in this article (average citation rate per published item) gives some idea of the frequency with which the "average" paper in a particular journal is cited. The factor is, of course, adversely affected by papers in the journal which are not cited at all, and, as noted above, favorably affected by papers cited with unusual frequency. The influence of uncited and very frequently cited papers can be discounted by considering the total number of citations in relation to cited items only (rather than in relation to all published items), or by considering only number of cited items (rather than total citations) in relation to all published items. For example, if the items-published base is 100 articles and one article has been cited 50 times while 99 articles have not been cited at all, the impact factor would be 0.50. The same impact factor of 0.50 could be derived for the journal that had half of its 100 articles cited only once and the other half not cited at all. If one considers only cited items, a per-cited-item impact factor can be derived to distinguish between the two journals. In the first case, the per-cited-item impact factor would be 50.0; in the second, 1.0. If one considers only the number of citable items cited, a citable-items-cited impact factor can be derived to further distinguish between the two journals. In the first case, the citable-items-cited impact factor would be 0.01; in the second, 0.5. Enormous amounts of computer time would be required to derive these different impact factors, although one must acknowledge their potential usefulness. It should be noted also that either of these impact factors can be derived from the other by dividing one of them into the impact factor used in this article.
28. The problem of selecting an items-published base is further complicated by the variety in the kinds of items published in scientific journals. Many journals publish only full-length reports of original research. Many others publish, in addition, editorials, technical communications, letters, notes, general correspondence, scientific news surveys and notes, book reviews, and so on; all of these are potentially citable items. I have not attempted in this article to limit the definition of items-published to lead articles, original communications, or the like. Even assuming it were possible to construct an acceptable classification that would accommodate all of the different kinds of published material, it would have been impossible for me, within the resources available for this article, to have examined individually each of the approximately 600,000 items that I use for the items-published base. If such a differentiation among kinds of material were included in an analysis such as this one, it is reasonable to assume that lead articles in such journals as *Science*, *Nature*, *Lancet*, and *Journal of the American Medical Association* would, as a group, have higher impact factors than those that are shown for these journals in Fig. 8.
29. The percentage (in terms of total citations) of citations of items that are 3 or fewer years old has been, for the years 1964 to 1970, 31.09, 30.24, 26.60, 25.91, 25.32, 25.18, and 23.95, respectively. It is interesting to note that the yearly percentage of such items has gradually decreased as SCI coverage has increased, while the citation rate per cited item has gradually increased (*19*). The significance of these trends is an interesting matter for future investigation.

Selected Bibliography
on
Journal Citation Analysis and Its Applications

This bibliography is by no means exhaustive. The author has endeavored, however, to include what he believes to be valuable background and useful examples of the application of citation analysis to the study of the sociology of science. Many of the items listed are the author's own work. Their number reflects no exclusive scope or merit of activity, but rather the author's interest and his access to ISI®'s unique data bank. Additional references on citation indexing, citation analysis, and journal evaluation will be found in the paper reprinted as part of this introduction.

Patterson A M. Journal citations in the *Recueil* 1937-1939. *Rec Trav. Chim. Pays-Bas* **59**:538-44, 1940.

Peraza R P. Journal self citation patterns in representative American, British and Canadian chemistry and physics journals. Drexel Institute of Technology, Masters thesis, June 1971.

Raisig L M. Mathematical evaluation of the scientific serial. *Science* **131**:1417-19, 1960.

Raisig L M. World biomedical journals, 1951-60; a study of the relative significance of 1388 titles indexed in *Current List of Medical Literature. Bull. Med. Library Assoc.* **54**:108-25, 1966.

Sandison A. Densities of use and absence of obsolescence in physics journals at MIT. *J. Amer. Soc. Inform. Sci.* **25**:172-82, 1974.

Sengupta I N. The ranking of biomedical periodicals from the Indian scientist's point of view; analysis of data for 1959-1968. *Unesco Bulletin for Libraries* **24**(3):143-52, 1970.

———— Factors determining changes in ranking of scientific periodicals; a study in relation to biomedical journals during the postwar period. *Internat. Library Rev.* **3**:271-85, 1975.

———— Impact of scientific serials on the advancement of medical knowledge; an objective method of analysis. *Internat. Library Rev.* **4**:169-95, 1972.

———— Growth of the biochemical literature. *Nature* **244**:75-6, 1973.

———— Choosing physiology periodicals; a recent study of the growth of its literature. *Ann. Library Sci. Documentation* **20**:39-57, 1973.

———— Recent growth of the literature of biochemistry and changes in ranking of periodicals. *J. Documentation* **29**:192-211, 1973.

———— Choosing pharmacology periodicals; study of the growth of literature in the field. *Ann. Library Sci. Documentation* **21**:1-21, 1974.

———— Choosing microbiology periodicals; study of the growth of literature in the field. *Ann. Library Sci. Documentation* **21**(3): 95-111, 1974.

Sengupta I N. Physiology periodicals. *Internat. Library Rev.* **6**:147-65, 1974.

———— The literature of microbiology. *Internat. Library Rev.* **6**:353-69, 1974.

Sherwood K K. Relative value of medical magazines. *Northwest Medicine* **31**:273-76, 1932.

Singh R S. Ranking of periodicals in chemistry from the point of view of Indian scientists. *Ann. Library Sci. Documentation 21:55-67, 1974.*

Smith M H. The selection of chemical engineering periodicals in college libraries. *College Res. Libraries* **5**:217-27, 1944.

Stevens R E. The study of the research use of libraries. *Library Quarterly* **26**:41-51, 1956.

Subramanyam K. Criteria for journal selection. *Special Libraries* **66**:367-71, 1975.

Van Styvendaele J H. Discovering the most consulted scientific serials in the Antwerp State University Centre library. *J. Librarianship* **6**:241-54, 1974.

Voigt M J. Scientific periodicals as a basic requirement for engineering and agricultural research. *College Res. Libraries* **8**:354-59, 375, 1947.

Williams J F & Pings V M. A study of the access to the scholarly record from a hospital health science core collection. *Bull. Med. Library Assoc.* **61**:408-15, 1973.

Windsor D A. Rational selection of primary journals for a biomedical research library; the use of secondary journal citations. *Special Libraries* **64**:446-51, 1973.

Abbreviated-to-Full Title Dictionary

ABBREVIATION	FULL TITLE
A GRAEFES A KLIN E O	ALBRECHT VON GRAEFES ARCHIV FUR KLINISCHE UND EXPERIMENTELLE OPHTHALMOLOGIE
A VAN LEEUW J MICROB	ANTONIE VAN LEEUWENHOEK JOURNAL OF MICROBIOLOGY AND SEROLOGY
AANA J	AANA JOURNAL (AMERICAN ASSOCIATION OF NURSE ANESTHETISTS)
AAPG BULL	AAPG BULLETIN-AMERICAN ASSOCIATION OF PETROLEUM GEOLOGISTS
ABRASIVE ENG	ABRASIVE ENGINEERING
ABSTR PAP AM CHEM S	ABSTRACTS OF PAPERS. AMERICAN CHEMICAL SOCIETY
ACAD MANAGE J	ACADEMY OF MANAGEMENT JOURNAL
ACAD THER	ACADEMIC THERAPY
ACCOUNT REV	ACCOUNTING REVIEW
ACCOUNTS CHEM RES	ACCOUNTS OF CHEMICAL RESEARCH
ACRIDA	ACRIDA
ACTA AGR SCAND	ACTA AGRICULTURAE SCANDINAVICA
ACTA AGROBOT	ACTA AGROBOTANICA
ACTA AGRON COL	ACTA AGRONOMICA (COLOMBIA)
ACTA AGRON HUNG	ACTA AGRONOMICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA ALIMENT HUNG	ACTA ALIMENTARIA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA ALLERGOL	ACTA ALLERGOLOGICA, AND SUPPLEMENTUM
ACTA ANAESTH BELG	ACTA ANAESTHESIOLOGICA BELGICA
ACTA ANAESTH SCAND	ACTA ANAESTHESIOLOGICA SCANDINAVICA, AND SUPPLEMENTUM
ACTA ANAT	ACTA ANATOMICA, AND SUPPLEMENTUM
ACTA ARCHAEOL HUNG	ACTA ARCHAEOLOGICA
ACTA ASTRONAUTICA	ACTA ASTRONAUTICA
ACTA BIOCHIM BIOPHYS	ACTA BIOCHIMICA AND BIOPHYSICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA BIOCHIM POL	ACTA BIOCHIMICA POLONICA
ACTA BIOCHIMICA IRAN	ACTA BIOCHIMICA IRANICA
ACTA BIOL CRACOV BOT	ACTA BIOLOGICA CRACOVIENSIA. SERIES BOTANICA
ACTA BIOL CRACOV ZOO	ACTA BIOLOGICA CRACOVIENSIA. SERIES ZOOLOGIA
ACTA BIOL HUNG	ACTA BIOLOGICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA BIOL MED GER	ACTA BIOLOGICA ET MEDICA GERMANICA
ACTA BOT HUNG	ACTA BOTANICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA BOT NEER	ACTA BOTANICA NEERLANDICA
ACTA BOTANICA INDICA	ACTA BOTANICA INDICA
ACTA CARDIOL	ACTA CARDIOLOGICA
ACTA CHEM SCAND	ACTA CHEMICA SCANDINAVICA. SERIES A. PHYSICAL AND INORGANIC CHEMISTRY
ACTA CHEM SCAND	ACTA CHEMICA SCANDINAVICA
ACTA CHEM SCAND	ACTA CHEMICA SCANDINAVICA. SERIES B. ORGANIC CHEMISTRY AND BIOCHEMISTRY
ACTA CHIM HUNG	ACTA CHIMICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA CHIR AUSTRIACA	ACTA CHIRURGICA AUSTRIACA
ACTA CHIR BELG	ACTA CHIRURGICA BELGICA
ACTA CHIR HUNG	ACTA CHIRURGICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA CHIR PLASTICAE	ACTA CHIRURGIAE PLASTICAE
ACTA CHIR SCAND	ACTA CHIRURGICA SCANDINAVICA
ACTA CIENT VENEZ	ACTA CIENTIFICA VENEZOLANA
ACTA CLINICA BELGICA	ACTA CLINICA BELGICA
ACTA CRYSTALLOGR A	ACTA CRYSTALLOGRAPHICA. SECTION A CRYSTAL PHYSICS, DIFFRACTION, THEORETICAL AND GENERAL CRYSTALLOGRAPHY
ACTA CRYSTALLOGR B	ACTA CRYSTALLOGRAPHICA. SECTION B STRUCTURAL CRYSTALLOGRAPHY AND CRYSTAL CHEMISTRY
ACTA CYTOL	ACTA CYTOLOGICA. CLINICAL CYTOLOGY
ACTA DERMAT-VENEREOL	ACTA DERMATO-VENEREOLOGICA, AND SUPPLEMENTUM
ACTA DIABETOL LAT	ACTA DIABETOLOGICA LATINA
ACTA ELECTRONICA	ACTA ELECTRONICA
ACTA ENDOCRINOL-COP	ACTA ENDOCRINOLOGICA, AND SUPPLEMENTUM
ACTA ENTOMOL BOHEMOS	ACTA ENTOMOLOGICA BOHEMOSLOVACA
ACTA ENTOMOL SINICA	ACTA ENTOMOLOGICA SINICA
ACTA GASTRO-ENT BELG	ACTA GASTRO-ENTEROLOGICA BELGICA
ACTA GASTROEN LATAM	ACTA GASTROENTEROLOGICA LATINOAMERICANA
ACTA GENET MED GEMEL	ACTA GENETICAE MEDICAE ET GEMELLOLOGIAE, AND SUPPLEMENTUM
ACTA GEOGR	ACTA GEOGRAPHICA (FRANCE)
ACTA GERONTOL	ACTA GERONTOLOGICA
ACTA GINECOL-MADRID	ACTA GINECOLOGICA
ACTA HAEMATOL	ACTA HAEMATOLOGICA
ACTA HAEMATOL JAPAN	ACTA HAEMATOLOGICA JAPONICA
ACTA HEPATO-GASTRO	ACTA HEPATO-GASTROENTEROLOGICA
ACTA HISTOCHEM	ACTA HISTOCHEMICA, AND SUPPLEMENTBAND
ACTA HISTOCHEM CYTOC	ACTA HISTOCHEMICA ET CYTOCHEMICA
ACTA HYDROCH HYDROB	ACTA HYDROCHIMICA ET HYDROBIOLOGICA
ACTA INFORM	ACTA INFORMATICA
ACTA MATH	ACTA MATHEMATICA, UPPSALA
ACTA MATH HUNG	ACTA MATHEMATICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA MECH	ACTA MECHANICA
ACTA MED HUNG	ACTA MEDICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA MED OKAYAMA	ACTA MEDICINAE OKAYAMA
ACTA MED PERU	ACTA MEDICA PERUANA
ACTA MED POL	ACTA MEDICA POLONA
ACTA MED SCAND	ACTA MEDICA SCANDINAVICA, AND SUPPLEMENTUM
ACTA MET	ACTA METALLURGICA
ACTA MICROBIOL HUNG	ACTA MICROBIOLOGICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA MICROBIOL POL	ACTA MICROBIOLOGICA POLONICA. SERIES B. MICROBIOLOGIA APPLICATA
ACTA MICROBIOL POL	ACTA MICROBIOLOGICA POLONICA SERIES A. MICROBIOLOGIA GENERALIS
ACTA MORPHOL HUNG	ACTA MORPHOLOGICA ACADEMIAE SCIENTIARUM HUNGARICAE, AND SUPPLEMENTUM
ACTA MORPHOL NEER SC	ACTA MORPHOLOGICA NEERLANDO-SCANDINAVICA
ACTA NEUROBIOL EXP	ACTA NEUROBIOLOGIAE EXPERIMENTALIS
ACTA NEUROCHIR	ACTA NEUROCHIRURGICA
ACTA NEUROL BEL	ACTA NEUROLOGICA BELGICA
ACTA NEUROL SCAND	ACTA NEUROLOGICA SCANDINAVICA, AND SUPPLEMENTUM
ACTA NEUROPATHOL BER	ACTA NEUROPATHOLOGICA
ACTA OBSTET GYN SCAN	ACTA OBSTETRICIA ET GYNECOLOGICA SCANDINAVICA, AND SUPPLEMENTUM
ACTA ODONTOL SCAND	ACTA ODONTOLOGICA SCANDINAVICA
ACTA OECON	ACTA OECONOMICA
ACTA OPHTHALMOL	ACTA OPHTHALMOLOGICA, KOBENHAVN, AND SUPPLEMENTUM
ACTA ORTHOP SCAND	ACTA ORTHOPAEDICA SCANDINAVICA, AND SUPPLEMENTUM
ACTA OTO-LARYNGOL	ACTA OTO-LARYNGOLOGICA
ACTA PAEDIAT HUNG	ACTA PAEDIATRICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA PAEDIAT JAP	ACTA PAEDIATRICA JAPONICA
ACTA PAEDIAT SCAND	ACTA PAEDIATRICA SCANDINAVICA, AND SUPPLEMENTUM
ACTA PAEDOPSYCHIAT	ACTA PAEDOPSYCHIATRICA
ACTA PATH MIC SCAN A	ACTA PATHOLOGICA ET MICROBIOLOGICA SCANDINAVICA. SECTION A. PATHOLOGY
ACTA PATH MIC SCAN B	ACTA PATHOLOGICA ET MICROBIOLOGICA SCANDINAVICA. SECTION B. MICROBIOLOGY AND IMMUNOLOGY
ACTA PATHOL JAP	ACTA PATHOLOGICA JAPONICA
ACTA PHARM SUEC	ACTA PHARMACEUTICA SUECICA
ACTA PHARMACOL TOX	ACTA PHARMACOLOGICA ET TOXICOLOGICA, AND SUPPLEMENTUM
ACTA PHYS CHEM	ACTA PHYSICA ET CHEMICA

ABBREVIATION	FULL TITLE
ACTA PHYS HUNG	ACTA PHYSICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA PHYS-AUSTR	ACTA PHYSICA AUSTRIACA
ACTA PHYSIOL HUNG	ACTA PHYSIOLOGICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA PHYSIOL LAT AM	ACTA PHYSIOLOGICA LATINO-AMERICANA
ACTA PHYSIOL POL	ACTA PHYSIOLOGICA POLONICA
ACTA PHYSIOL SCAND	ACTA PHYSIOLOGICA SCANDINAVICA, AND SUPPLEMENTUM
ACTA PHYTOPATHOL HUN	ACTA PHYTOPATHOLOGICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA POL PHARM	ACTA POLONIAE PHARMACEUTICA
ACTA POLYTECH SC CH	ACTA POLYTECHNICA SCANDINAVICA. CHEMISTRY INCLUDING METALLURGY SERIES
ACTA POLYTECH SC CI	ACTA POLYTECHNICA SCANDINAVICA. CIVIL ENGINEERING AND BUILDING CONSTRUCTION SERIES
ACTA POLYTECH SC EL	ACTA POLYTECHNICA SCANDINAVICA. ELECTRICAL ENGINEERING SERIES
ACTA POLYTECH SC MA	ACTA POLYTECHNICA SCANDINAVICA. MATHEMATICS AND COMPUTING MACHINERY SERIES
ACTA POLYTECH SC ME	ACTA POLYTECHNICA SCANDINAVICA. MECHANICAL ENGINEERING SERIES
ACTA POLYTECH SC PH	ACTA POLYTECHNICA SCANDINAVICA. PHYSICS INCLUDING NUCLEONICS SERIES
ACTA PROTOXOOLOGICA	ACTA PROTOZOOLOGICA
ACTA PSIQUIAT PSICOL	ACTA PSIQUIATRICA Y PSICOLOGICA DE AMERICA LATINA
ACTA PSYCHIAT SCAND	ACTA PSYCHIATRICA SCANDINAVICA, AND SUPPLEMENTUM
ACTA PSYCHOL	ACTA PSYCHOLOGICA
ACTA PSYCHOL TAIWAN	ACTA PSYCHOLOGICA TAIWANICA
ACTA RADIOL DIAGN	ACTA RADIOLOGICA. DIAGNOSIS
ACTA RADIOL THER PHY	ACTA RADIOLOGICA. THERAPY, PHYSICS, BIOLOGY
ACTA SCI MATH	ACTA SCIENTIARUM MATHEMATICARUM
ACTA SOC BOT POL	ACTA SOCIETATIS BOTANICORUM POLONIAE
ACTA SOCIOL	ACTA SOCIOLOGICA- JOURNAL OF THE SCANDINAVIAN SOCIOLOGICAL ASSOCIATION
ACTA TECH HUNG	ACTA TECHNICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA THERIOL	ACTA THERIOLOGICA
ACTA U AGR FAC AGRON	ACTA UNIVERSITATIS AGRICULTURAE FACULTAS AGRONOMICA
ACTA U AGR FAC SILVI	ACTA UNIVERSITATIS AGRICULTURAE FACULTAS SILVICULTURAE
ACTA UROL BELG	ACTA UROLOGICA BELGICA
ACTA VET BRNO	ACTA VETERINARIA BRNO
ACTA VET HUNG	ACTA VETERINARIA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA VET SCAND	ACTA VETERINARIA SCANDINAVICA, AND SUPPLEMENTUM
ACTA VET-BELG	ACTA VETERINARIA-BEOGRAD-
ACTA VIROL	ACTA VIROLOGICA. ENGLISH EDITION
ACTA VITAMINOL ENZYM	ACTA VITAMINOLOGICA ET ENZYMOLOGICA
ACTA ZOOL HUNG	ACTA ZOOLOGICA ACADEMIAE SCIENTIARUM HUNGARICAE
ACTA ZOOL SINICA	ACTA ZOOLOGICA SINICA
ACTIV NERV SUPER	ACTIVITAS NERVOSA SUPERIOR
ACTIV REP MIL F	ACTIVITIES REPORT RESEARCH AND DEVELOPMENT ASSOCIATES FOR MILITARY FOOD AND PACKAGING SYSTEMS INC
ACTUAL ECON	ACTUALITE ECONOMIQUE
ACUSTICA	ACUSTICA
ADAS QUART REV	A. D. A. S. QUARTERLY REVIEW/ THE JOURNAL OF THE AGRICULTURAL DEVELOPMENT AND ADVISORY SERVICE
ADHES AGE	ADHESIVES AGE
ADMIN LAW REV	ADMINISTRATIVE LAW REVIEW
ADMIN MENT HEALTH	ADMINISTRATION IN MENTAL HEALTH
ADMIN SCI QUART	ADMINISTRATIVE SCIENCE QUARTERLY
ADMIN SOC	ADMINISTRATION AND SOCIETY
ADOLESCENCE	ADOLESCENCE
ADULT EDUC-LONDON	ADULT EDUCATION- LONDON
ADULT EDUC-WASH	ADULT EDUCATION-WASHINGTON
ADV ACTIV ANAL	ADVANCES IN ACTIVATION ANALYSIS
ADV APPL MICROBIOL	ADVANCES IN APPLIED MICROBIOLOGY
ADV ASTRON	ADVANCES IN ASTRONOMY AND ASTROPHYSICS
ADV ATOM MOL PHYS	ADVANCES IN ATOMIC & MOLECULAR PHYSICS
ADV BIOL MED PHYS	ADVANCES IN BIOLOGICAL & MEDICAL PHYSICS
ADV BIOMED ENG	ADVANCES IN BIOMEDICAL ENGINEERING
ADV BOT RES	ADVANCES IN BOTANICAL RESEARCH
ADV BRAIN RES	ADVANCES IN BRAIN RESEARCH
ADV CANCER RES	ADVANCES IN CANCER RESEARCH
ADV CARBOHYD CHEM BI	ADVANCES IN CARBOHYDRATE CHEMISTRY & BIOCHEMISTRY
ADV CARDIOL	ADVANCES IN CARDIOLOGY
ADV CATAL	ADVANCES IN CATALYSIS
ADV CELL MOL BIOL	ADVANCES IN CELLULAR & MOLECULAR BIOLOGY
ADV CHEM ENG	ADVANCES IN CHEMICAL ENGINEERING
ADV CHEM SER	ADVANCES IN CHEMISTRY SERIES
ADV CLIN CHEM	ADVANCES IN CLINICAL CHEMISTRY
ADV COLLOID INTERFAC	ADVANCES IN COLLOID AND INTERFACE SCIENCE
ADV COMP PHYSIOL BIO	ADVANCES IN COMPARATIVE PHYSIOLOGY AND BIOCHEMISTRY
ADV COMPUTERS	ADVANCES IN COMPUTERS
ADV CONTROL SYSTEM	ADVANCES IN CONTROL SYSTEMS THEORY AND APPLICATIONS
ADV CYCLIC NUCL RES	ADVANCES IN CYCLIC NUCLEOTIDE RESEARCH
ADV DRUG RES	ADVANCES IN DRUG RESEARCH
ADV ECOL RESEARCH	ADVANCES IN ECOLOGICAL RESEARCH
ADV ELECTRON EL PHYS	ADVANCES IN ELECTRONICS & ELECTRON PHYSICS
ADV ENZYM REGULATION	ADVANCES IN ENZYME REGULATION
ADV ENZYMOL RAMB	ADVANCES IN ENZYMOLOGY AND RELATED AREAS OF MOLECULAR BIOLOGY
ADV EXP MED BIOL	ADVANCES IN EXPERIMENTAL MEDICINE AND BIOLOGY
ADV FOOD RES	ADVANCES IN FOOD RESEARCH
ADV GENET	ADVANCES IN GENETICS
ADV GEOPHYS	ADVANCES IN GEOPHYSICS
ADV GERONTOL RES	ADVANCES IN GERONTOLOGICAL RESEARCH
ADV HEAT TRANSFER	ADVANCES IN HEAT TRANSFER
ADV HETEROCYCL CHEM	ADVANCES IN HETEROCYCLIC CHEMISTRY
ADV HUM GENET	ADVANCES IN HUMAN GENETICS
ADV HYDROSCI	ADVANCES IN HYDROSCIENCE
ADV IMMUNOL	ADVANCES IN IMMUNOLOGY
ADV INORG CHEM RAD	ADVANCES IN INORGANIC CHEMISTRY & RADIOCHEMISTRY
ADV INSECT PHYSIOL	ADVANCES IN INSECT PHYSIOLOGY
ADV INTERNAL MED	ADVANCES IN INTERNAL MEDICINE
ADV LIPID RES	ADVANCES IN LIPID RESEARCH
ADV MACROMOL CHEM	ADVANCES IN MACROMOLECULAR CHEMISTRY
ADV MAGN RESON	ADVANCES IN MAGNETIC RESONANCE
ADV MAR BIOL	ADVANCES IN MARINE BIOLOGY
ADV MATH	ADVANCES IN MATHEMATICS
ADV METAB DISORDERS	ADVANCES IN METABOLIC DISORDERS
ADV MICROCIRCULAT	ADVANCES IN MICROCIRCULATION
ADV MICROWAVES	ADVANCES IN MICROWAVES
ADV MOL RELAX PROCES	ADVANCES IN MOLECULAR RELAXATION PROCESSES
ADV MORPHOGEN	ADVANCES IN MORPHOGENESIS
ADV OBSTET GYNECOL	ADVANCES IN OBSTETRICS AND GYNECOLOGY
ADV OPHTHALMOL	ADVANCES IN OPHTHALMOLOGY

ABBREVIATION	FULL TITLE
ADV OPT ELECTRON MIC	ADVANCES IN OPTICAL ELECTRON MICROSCOPY
ADV ORAL BIOL	ADVANCES IN ORAL BIOLOGY
ADV ORGANOMETAL CHEM	ADVANCES IN ORGANOMETALLIC CHEMISTRY
ADV OTO-RHINO-LARYNG	ADVANCES IN OTO-RHINO-LARYNGOLOGY
ADV PARASIT	ADVANCES IN PARASITOLOGY
ADV PHARM SCI	ADVANCES IN PHARMACEUTICAL SCIENCES
ADV PHARMACOL CHEMOT	ADVANCES IN PHARMACOLOGY & CHEMOTHERAPY
ADV PHYS	ADVANCES IN PHYSICS
ADV PHYS ORGAN CHEM	ADVANCES IN PHYSICAL ORGANIC CHEMISTRY
ADV PROT CHEM	ADVANCES IN PROTEIN CHEMISTRY
ADV PSYCHOSOM MED	ADVANCES IN PSYCHOSOMATIC MEDICINE
ADV QUANT CHEM	ADVANCES IN QUANTUM CHEMISTRY
ADV QUANT ELECTRON	ADVANCES IN QUANTUM ELECTRONICS
ADV REPROD PHYSIOL	ADVANCES IN REPRODUCTIVE PHYSIOLOGY
ADV SPACE SCI TECH	ADVANCES IN SPACE SCIENCE AND TECHNOLOGY
ADV STEROID BIOCHEM	ADVANCES IN STEROID BIOCHEMISTRY AND PHARMACOLOGY
ADV STUD BEHAVIOR	ADVANCES IN THE STUDY OF BEHAVIOR
ADV VET SCI COMP MED	ADVANCES IN VETERINARY SCIENCE & COMPARATIVE MEDICINE
ADV VIRUS RES	ADVANCES IN VIRUS RESEARCH
AEDS J ASS ED DA SYS	AEDS JOURNAL (ASSOCIATION FOR EDUCATION DATA SYSTEMS)
AERONAUT J	AERONAUTICAL JOURNAL
AERONAUT QUART	AERONAUTICAL QUARTERLY
AERONAUTIQUE LASTRO	AERONAUTIQUE ET L'ASTRONAUTIQUE
AEROSPACE MED	AEROSPACE MEDICINE
AEROTEC MISSILI SPAZ	AEROTECNICA/MISSILI AND SPAZIO
AEU-ARCH ELEKTRON UB	AEU-ARCHIV FUR ELEKTRONIK UND UBERTRAGUNGSTECHNIK/ELECTRONICS AND COMMUNICATION
AFINIDAD	AFINIDAD
AFR AFFAIRS	AFRICAN AFFAIRS (THE JOURNAL OF THE ROYAL AFRICAN SOCIETY)
AFR DIG	AFRICA DIGEST
AFR J MED SCI	AFRICAN JOURNAL OF MEDICAL SCIENCES
AFR SOC RES	AFRICAN SOCIAL RESEARCH
AFR STUD	AFRICAN STUDIES
AFR TODAY	AFRICA TODAY
AFRICA	AFRICA
AFRO-AM STUD	AFRO-AMERICAN STUDIES
AG CHEM COMM FERTIL	AG CHEM AND COMMERCIAL FERTILIZER
AGENT ACTION	AGENTS AND ACTIONS
AGR AM	AGRICULTURA DE LAS AMERICAS
AGR AVIAT	AGRICULTURAL AVIATION
AGR BIOL CHEM TOKYO	AGRICULTURAL AND BIOLOGICAL CHEMISTRY
AGR ECON RES	AGRICULTURAL ECONOMICS RESEARCH
AGR EDUC MAG	AGRICULTURAL EDUCATION MAGAZINE
AGR ENG	AGRICULTURAL ENGINEERING
AGR HIST	AGRICULTURAL HISTORY
AGR HIST REV	AGRICULTURAL HISTORY REVIEW
AGR HORT GENET	AGRI HORTIQUE GENETICA
AGR METEOROL	AGRICULTURAL METEOROLOGY
AGR N IRELAND	AGRICULTURE IN NORTHERN IRELAND
AGR RES	AGRICULTURAL RESEARCH
AGR RES SER SP PUB	AGRICULTURAL RESEARCH SERVICE SPECIAL PUBLICATION
AGR SCI REV	AGRICULTURAL SCIENCE REVIEW
AGRARTECHNIK	AGRARTECHNIK
AGRARTORT SZEMLE	AGRARTORTENETI SZEMLE
AGRESSOLOGIE	AGRESSOLOGIE
AGRO-ECOSYSTEMS	AGRO-ECOSYSTEMS
AGROCHIMICA	AGROCHIMICA
AGROKEM TALAJTAN	AGROKEMIA ES TALAJTAN
AGROLOGIST	AGROLOGIST
AGRON J	AGRONOMY JOURNAL
AGRON TROP	AGRONOMIA TROPICAL
AHME J ASS HOS MED E	AHME JOURNAL (ASSOCIATION FOR HOSPITAL MEDICAL EDUCATION)
AIAA J	AIAA JOURNAL
AICHE J-AM INST CH E	AICHE JOURNAL (AMERICAN INSTITUTE OF CHEMICAL ENGINEERS)
AIR FORCE CIVIL ENG	AIR FORCE CIVIL ENGINEERING
AIRCRAFT ENG	AIRCRAFT ENGINEERING
AJIA KEIZAI-J INST D	AJIA KEIZAI. JOURNAL OF THE INSTITUTE OF DEVELOPING ECONOMICS
AKTUEL CHIR	AKTUELLE CHIRURGIE
AKTUEL GERONTOL	AKTUELLE GERONTOLOGIE
AKTUEL TRAUMATOL	AKTUELLE TRAUMATOLOGIE
AKTUEL UROL	AKTUELLE UROLOGIE
ALA AGR EXP STA BULL	ALABAMA AGRICULTURAL EXPERIMENT STATION BULLETIN
ALA AGR EXP STA CIRC	ALABAMA AGRICULTURAL EXPERIMENT STATION CIRCULAR
ALA AGR EXP STA PROG	ALABAMA AGRICULTURAL EXPERIMENT STATION PROGRESS REPORT SERIES
ALASKA I AGR SCI RES	ALASKA INSTITUTE OF AGRICULTURAL SCIENCE RESEARCH REPORT
ALASKA IND	ALASKA INDUSTRY
ALASKA MED	ALASKA MEDICINE
ALBERTA J EDUC RES	ALBERTA JOURNAL OF EDUCATIONAL RESEARCH
ALIMENT ANIMAL	ALIMENTAZIONE ANIMALE
ALIMENTA	ALIMENTA
ALLG FORSTZTG	ALLGEMEINE FORSTZEITUNG
ALTA FREQ	ALTA FREQUENZA
ALTERNATIVE-AM SPEC	THE ALTERNATIVE- AN AMERICAN SPECTATOR
AM ACA POL SOC SCI M	AMERICAN ACADEMY OF POLITICAL AND SOCIAL SCIENCE MONOGRAPHS
AM ANN DEAF	AMERICAN ANNALS OF THE DEAF
AM ANTIQUITY	AMERICAN ANTIQUITY
AM ARCH REHABIL TH	AMERICAN ARCHIVES OF REHABILITATION THERAPY
AM ARCHIVIST	AMERICAN ARCHIVIST
AM ASSOC U PROF BULL	AMERICAN ASSOCIATION OF UNIVERSITY PROFESSORS BULLETIN
AM BANKRUPT LAW J	AMERICAN BANKRUPTCY LAW JOURNAL
AM BAR ASSOC J	AMERICAN BAR ASSOCIATION JOURNAL
AM BEE J	AMERICAN BEE JOURNAL
AM BEHAV SCI	AMERICAN BEHAVIORAL SCIENTIST
AM BIOL TEACH	AMERICAN BIOLOGY TEACHER

AM MINERALOGIST	AMERICAN MINERALOGIST
AM NATURALIST	AMERICAN NATURALIST
AM PAP IND	AMERICAN PAPER INDUSTRY
AM PHIL QUART	AMERICAN PHILOSOPHICAL QUARTERLY
AM POLIT QUART	AMERICAN POLITICS QUARTERLY
AM POLIT SCI REV	AMERICAN POLITICAL SCIENCE REVIEW
AM POTATO J	AMERICAN POTATO JOURNAL
AM PSYCHOL	AMERICAN PSYCHOLOGIST
AM REV RESP DIS	AMERICAN REVIEW OF RESPIRATORY DISEASES
AM SCHOLAR	AMERICAN SCHOLAR
AM SCI	AMERICAN SCIENTIST
AM SOCIOL	AMERICAN SOCIOLOGIST
AM SOCIOL REV	AMERICAN SOCIOLOGICAL REVIEW
AM STATIST	AMERICAN STATISTICIAN
AM VEG GROW	AMERICAN VEGETABLE GROWER
AM VOCAT J	AMERICAN VOCATIONAL JOURNAL
AM ZOOL	AMERICAN ZOOLOGIST
AMBIO	AMBIO- A JOURNAL OF THE HUMAN ENVIRONMENT, RESEARCH AND MANAGEMENT
AMER ANTHROPOL	AMERICAN ANTHROPOLOGIST
AMERICAS	AMERICAS
AN ACAD BRASIL CIENC	ANAIS DA ACADEMIA BRASILEIRA DE CIENCIAS
AN ASOC QUIM ARGENT	ANALES DE LA ASOCIACION QUIMICA ARGENTINA
AN ESPAN PEDIATR	ANALES ESPANOLA DE PEDIATRICA
AN FIS	ANALES DE FISICA
AN QUIM	ANALES DE QUIMICA
ANAESTH INTENSIVE CA	ANAESTHESIA AND INTENSIVE CARE
ANAESTHESIA	ANAESTHESIA
ANAESTHESIST	ANAESTHESIST
ANAL BIOCHEM	ANALYTICAL BIOCHEMISTRY
ANAL CHEM	ANALYTICAL CHEMISTRY
ANAL CHIM ACTA	ANALYTICA CHIMICA ACTA
ANAL LETT	ANALYTICAL LETTERS
ANAL PREVISION	ANALYSE ET PREVISION
ANALUSIS	ANALUSIS- CHIMIE ANALYTIQUE METHODES PHYSIQUES D'ANALYSE
ANALYST	ANALYST
ANAT HIST EMBRYOLOG	ANATOMIA HISTOLOGIA EMBRYOLOGIA (ZENTRALBLATT FUR VETERINARMEDIZIN, REIHE C)
ANAT REC	ANATOMICAL RECORD
ANESTH ANALG CURR RE	ANESTHESIA AND ANALGESIA, CURRENT RESEARCHES
ANESTH ANALG REANIM	ANESTHESIE, ANALGESIE, REANIMATION
ANESTHESIOLOGY	ANESTHESIOLOGY
ANGEW BOT	ANGEWANDTE BOTANIK
ANGEW CHEM	ANGEWANDTE CHEMIE. INTERNATIONAL EDITION IN ENGLISH
ANGEW CHEM	ANGEWANDTE CHEMIE

ABBREVIATION	FULL TITLE
ANGEW INFORM	ANGEWANDTE INFORMATIK
ANGEW MAKROMOL CHEM	ANGEWANDTE MAKROMOLEKULARE CHEMIE
ANGIOLOGICA	ANGIOLOGICA
ANGIOLOGY	ANGIOLOGY
ANGLE ORTHODONT	ANGLE ORTHODONTIST
ANIM BEHAV	ANIMAL BEHAVIOUR
ANIM BLOOD GROUP	ANIMAL BLOOD GROUPS AND BIOCHEMICAL GENETICS
ANIM LEARN BEHAV	ANIMAL LEARNING AND BEHAVIOR
ANIM PROD	ANIMAL PRODUCTION
ANN AGR FENN	ANNALES AGRICULTURAE FENNIAE
ANN AGRON	ANNALES AGRONOMIQUES
ANN ALLERGY	ANNALS OF ALLERGY
ANN AM ACAD POLIT SS	ANNALS OF THE AMERICAN ACADEMY POLITICAL AND SOCIAL SCIENCE
ANN AMELIOR PLANT	ANNALES DE L'AMELIORATION DES PLANTES
ANN ANAT PATHOL	ANNALES D'ANATOMIE PATHOLOGIQUE
ANN ANESTH FR	ANNALES DE L'ANESTHESIOLOGIE FRANCAISE
ANN APPL BIOL	ANNALS OF APPLIED BIOLOGY
ANN ARID ZONE	ANNALS OF ARID ZONE
ANN ASSOC AM GEOGR	ANNALS OF THE ASSOCIATION OF AMERICAN GEOGRAPHERS
ANN BIOL ANIM BIOCH	ANNALES DE BIOLOGIE ANIMALE BIOCHIMIE BIOPHYSIQUE
ANN BIOL CLIN-PARIS	ANNALES DE BIOLOGIE CLINIQUE
ANN BIOMED ENG	ANNALS OF BIOMEDICAL ENGINEERING
ANN BOT	ANNALS OF BOTANY
ANN BOT FENN	ANNALES BOTANICI FENNICI
ANN CARDIOL ANGEIOL	ANNALES DE CARDIOLOGIE ET D'ANGEIOLOGIE
ANN CHEM JUST LIEB	ANNALEN DER CHEMIE, JUSTUS LIEBIG
ANN CHIM-PARIS	ANNALES DE CHIMIE, FRANCE
ANN CHIM-ROME	ANNALI DI CHIMICA
ANN CHIR	ANNALES DE CHIRURGIE
ANN CHIR GYNAECOL FE	ANNALES CHIRURGIAE ET GYNAECOLOGIAE FENNIAE
ANN CHIR INFANT	ANNALES DE CHIRURGIE INFANTILE
ANN CHIR PLAST	ANNALES DE CHIRURGIE PLASTIQUE
ANN CLIN BIOCHEM	ANNALS OF CLINICAL BIOCHEMISTRY
ANN CLIN LAB SCI	ANNALS OF CLINICAL LABORATORY SCIENCE
ANN CLIN RES	ANNALS OF CLINICAL RESEARCH
ANN DERMATOL SYPHIL	ANNALES DE DERMATOLOGIE ET DE SYPHILIGRAPHIE
ANN ECON SOC MEAS	ANNALS OF ECONOMIC AND SOCIAL MEASUREMENT
ANN ECON SOC RURAL	ANNALES D' ECONOMIE ET DE SOCIOLOGIE RURALES
ANN EMBRYOL MORPHO	ANNALES D'EMBRYOLOGIE ET DE MORPHOGENESE
ANN ENDOCRINOL-PARIS	ANNALES D' ENDOCRINOLOGIE, ET SUPPLEMENTAIRE
ANN ENTOMOL SOC AM	ANNALS OF THE ENTOMOLOGICAL SOCIETY OF AMERICA
ANN GASTROENT HEPATO	ANNALES DE GASTROENTEROLOGIE ET D' HEPATOLOGIE
ANN GENET SELEC ANIM	ANNALES DE GENETIQUES ET DE SELECTION ANIMALE
ANN GENET-PARIS	ANNALES DE GENETIQUE
ANN GEOFIS-ROME	ANNALI DI GEOFISICA
ANN GEOGR-PARIS	ANNALES DE GEOGRAPHIE
ANN GEOPHYS-PARIS	ANNALES DE GEOPHYSIQUE
ANN HISTOCHIM	ANNALES D' HISTOCHIMIE
ANN HUM BIOL	ANNALS OF HUMAN BIOLOGY
ANN HUM GENET	ANNALS OF HUMAN GENETICS
ANN HYDROBIOL	ANNALES D' HYDROBIOLOGIE
ANN I FOURIER	ANNALES DE L' INSTITUT FOURIER
ANN I H POINCARE A	ANNALES DE L' INSTITUT HENRI POINCARE. SECTION A. PHYSIQUE THEORIQUE
ANN I H POINCARE B	ANNALES DE L' INSTITUT HENRI POINCARE. SECTION B. CALCUL DES PROBABILITES ET STATISTIQUE
ANN I OCEANOGR PAR	ANNALES DE L' INSTITUT OCEANOGRAPHIQUE (PARIS)
ANN I STATIST MATH	ANNALS OF THE INSTITUTE OF STATISTICAL MATHEMATICS
ANN IMMUNOL	ANNALES D' IMMUNOLOGIE
ANN INTERN MED	ANNALS OF INTERNAL MEDICINE
ANN MATH	ANNALS OF MATHEMATICS
ANN MED EXP BIOL FEN	ANNALES MEDICINAE EXPERIMENTALIS ET BIOLOGIAE FENNIAE
ANN MED INTERN	ANNALES DE MEDECINE INTERNE
ANN MED SEC PO AC	ANNALS OF THE MEDICAL SECTION OF THE POLISH ACADEMY OF SCIENCES
ANN MED VET	ANNALES DE MEDECINE VETERINAIRE
ANN MEDICO-PSYCHOL	ANNALES MEDICO-PSYCHOLOGIQUES
ANN MICROBIOL	ANNALES DE MICROBIOLOGIE-INSTITUT PASTEUR
ANN MO BOT GARD	ANNALS OF THE MISSOURI BOTANICAL GARDEN
ANN NUCL SCI ENG	ANNALS OF NUCLEAR SCIENCE AND ENGINEERING
ANN NUTR ALIMENT	ANNALES DE LA NUTRITION ET DE L' ALIMENTATION
ANN NY ACAD SCI	ANNALS OF THE NEW YORK ACADEMY OF SCIENCES
ANN OCUL	ANNALES D'OCULISTIQUE
ANN OPHTHAL	ANNALS OF OPHTHALMOLOGY
ANN OTO RHINOL LARYN	ANNALS OF OTOLOGY, RHINOLOGY AND LARYNGOLOGY
ANN OTO-LAR CHIR C-F	ANNALES D' OTO-LARYNGOLOGIE ET DE CHIRURGIE CERVICO-FACIALE
ANN PAEDIAT JAP	ANNALES PAEDIATRICI JAPONICI
ANN PARASIT HUM COMP	ANNALES DE PARASITOLOGIE HUMAINE ET COMPAREE
ANN PHARM FR	ANNALES PHARMACEUTIQUES FRANCAISES
ANN PHYS BIOL MED	ANNALES DE PHYSIQUE BIOLOGIQUE ET MEDICALE
ANN PHYS-LEIPZIG	ANNALEN DER PHYSIK
ANN PHYS-NY	ANNALS OF PHYSICS
ANN PHYS-PARIS	ANNALES DE PHYSIQUE
ANN PHYTOPATHOL	ANNALES DE PHYTOPATHOLOGIE
ANN PROBAB	ANNALS OF PROBABILITY
ANN PSYCHOLOGIQUE	ANNEE PSYCHOLOGIQUE
ANN RADIOL	ANNALES DE RADIOLOGIE, RADIOLOGIE CLINIQUE - RADIOBIOLOGIE
ANN RECH VET	ANNALES DE RECHERCHES VETERINAIRES
ANN RHEUM DIS	ANNALS OF THE RHEUMATIC DISEASES
ANN ROY COLL SURG	ANNALS OF THE ROYAL COLLEGE OF SURGEONS OF ENGLAND
ANN SCI	ANNALS OF SCIENCE
ANN SCI ECON APPL	ANNALES DE SCIENCES ECONOMIQUES APPLIQUEES
ANN SCI FOREST	ANNALES DES SCIENCES FORESTIERES
ANN SCI NAT	ANNALES DES SCIENCES NATURELLES BOTANIQUE ET BIOLOGIE VEGETALE
ANN SCI NAT ZOOL	ANNALES DES SCIENCES NATURELLES ZOOLOGIE ET BIOLOGIE ANIMALE
ANN SCLAVO	ANNALI SCLAVO
ANN SOC BELG MED TR	ANNALES DE LA SOCIETE BELGE DE MEDECINE TROPICALE
ANN SOC ENTOMOL FR	ANNALES DE LA SOCIETE ENTOMOLOGIQUE DE FRANCE
ANN SOC SCI BRUX	ANNALES DE LA SOCIETE SCIENTIFIQUE DE BRUXELLES SERIE 1. SCIENCES MATHEMATIQUES, ASTRONOMIQUES ET PHYSIQUES
ANN STATIST	ANNALS OF STATISTICS
ANN SURG	ANNALS OF SURGERY
ANN TECHNOL AGR	ANNALES DE TECHNOLOGIE AGRICOLE
ANN TELECOMMUN	ANNALES DES TELECOMMUNICATIONS
ANN THORAC SURG	ANNALS OF THORACIC SURGERY
ANN TROP MED PARASIT	ANNALS OF TROPICAL MEDICINE AND PARASITOLOGY
ANN UROL	ANNALES D' UROLOGIE

ABBREVIATION	FULL TITLE
ANN ZOOL ECOL ANIM	ANNALES DE ZOOLOGIE ECOLOGIE ANIMALE
ANN ZOOL FENN	ANNALES ZOOLOGICI FENNICI
ANN ZOOTECH	ANNALES DE ZOOTECHNIE
ANN-ECON SOC CIVIL	ANNALES-ECONOMIES SOCIETES CIVILISATIONS
ANNOT ZOOL JAP	ANNOTATIONES ZOOLOGICAE JAPONENSES
ANNU ANIM PSYCHOL	ANNUAL OF ANIMAL PSYCHOLOGY
ANNU REP MED CHEM	ANNUAL REPORTS IN MEDICAL CHEMISTRY
ANNU REP NMR SPECTRO	ANNUAL REPORTS ON NMR SPECTROSCOPY
ANNU REP PROG CHEM A	ANNUAL REPORTS ON THE PROGRESS OF CHEMISTRY. SECTION A. GENERAL PHYSICAL AND INORGANIC CHEMISTRY
ANNU REP PROG CHEM B	ANNUAL REPORTS ON THE PROGRESS OF CHEMISTRY. SECTION B. ORGANIC CHEMISTRY
ANNU REV ANTHROPOL	ANNUAL REVIEW OF ANTHROPOLOGY
ANNU REV ASTRON ASTR	ANNUAL REVIEW OF ASTRONOMY AND ASTROPHYSICS
ANNU REV BIOCHEM	ANNUAL REVIEW OF BIOCHEMISTRY
ANNU REV BIOPHYS BIO	ANNUAL REVIEW OF BIOPHYSICS AND BIOENGINEERING
ANNU REV EARTH PL SC	ANNUAL REVIEW OF EARTH AND PLANETARY SCIENCE
ANNU REV ECOL SYST	ANNUAL REVIEW OF ECOLOGY AND SYSTEMATICS
ANNU REV ENTOMOL	ANNUAL REVIEW OF ENTOMOLOGY

EEG-EMG-Z ELEK ELEKT	EEG-EMG-ZEITSCHRIFT FUR ELEKTROENZEPHALOGRAPHIE, ELEKTROMYOGRAPHIA, UND VERWANDTE GEBIETE
EEI BULL EDISON ELEC	EEI BULLETIN(EDISON ELECTRICAL INSTITUTE)
EFFLUENT WATER TREAT	EFFLUENT AND WATER TREATMENT JOURNAL

ABBREVIATION	FULL TITLE
EFTA BULL EUR FREE T	EFTA BULLETIN (EUROPEAN FREE TRADE ASSOCIATION)
EGYPT J CHEM	EGYPTIAN JOURNAL OF CHEMISTRY
EGYPT J GENET CYTOL	EGYPTIAN JOURNAL OF GENETICS AND CYTOLOGY
EKISTICS	EKISTICS
EKON CAS	EKONOMICKY CASOPIS
EKON MATH OBZ	EKONOMICKO-MATEMATICKY OBZOR
EKON SAMF TIDSKR	EKONOMISKA SAMFUNDETS TIDSKRIFT
ELEC COMMUN	ELECTRICAL COMMUNICATION
ELEC ENG JAPAN	ELECTRICAL ENGINEERING IN JAPAN
ELEC OPT SYST DES	ELECTRO-OPTICAL SYSTEMS DESIGN
ELEC REV LOND	ELECTRICAL REVIEW
ELEC TECHNOL USSR*	ELECTRIC TECHNOLOGY, USSR
ELECTROCHIM ACTA	ELECTROCHIMICA ACTA
ELECTRODEP SUR TREAT	ELECTRODEPOSITION AND SURFACE TREATMENT
ELECTROEN CLIN NEURO	ELECTROENCEPHALOGRAPHY AND CLINICAL NEUROPHYSIOLOGY
ELECTRON ENG LOND	ELECTRONIC ENGINEERING
ELECTRON LETT	ELECTRONICS LETTERS
ELECTRON POWER	ELECTRONICS & POWER
ELECTRON PROD	ELECTRONIC PRODUCTS MAGAZINE
ELECTRONIC DESIGN	ELECTRONIC DESIGN
ELECTRONICS	ELECTRONICS
ELECTRONICS COMM JAP	ELECTRONICS AND COMMUNICATIONS IN JAPAN
ELEKTROTECH Z AUSG B	ELEKTROTECHNISCHE ZEITSCHRIFT. AUSGABE B
ELELMEZESI IPAR	ELELMEZESI IPAR
ELEM ENGL	ELEMENTARY ENGLISH
ELEM SCHOOL J*	ELEMENTARY SCHOOL JOURNAL
ELETTROTECNICA	ELETTROTECNICA
ELIN Z	ELIN ZEITSCHRIFT
EMERGEN MED	EMERGENCY MEDICINE
EMERGEN MED SERV	EMERGENCY MEDICAL SERVICES
EMORY LAW J	EMORY LAW JOURNAL
ENDEAVOUR	ENDEAVOUR
ENDOCRINE RES COMMUN	ENDOCRINE RESEARCH COMMUNICATIONS
ENDOCRINOL EXPER	ENDOCRINOLOGIA EXPERIMENTALIS
ENDOCRINOL JAP	ENDOCRINOLOGIA JAPONICA
ENDOCRINOLOGY	ENDOCRINOLOGY
ENDOKRINOLOGIE	ENDOKRINOLOGIE
ENDOSCOPY	ENDOSCOPY
ENERG ATOMTECH	ENERGIA ES ATOMTECHNIKA
ENERG CONVERS	ENERGY CONVERSION
ENERG DIG	ENERGY DIGEST
ENERG NUCL-MADRID	ENERGIA NUCLEAR, MADRID
ENERG NUCL-MILAN	ENERGIA NUCLEARE
ENERG POLICY	ENERGY POLICY
ENG CYBERN	ENGINEERING CYBERNETICS
ENG EDUC	ENGINEERING EDUCATION
ENG FRACTURE MECH	ENGINEERING FRACTURE MECHANICS
ENG GEOL	ENGINEERING GEOLOGY
ENG GRAPHIC	ENGINEERING GRAPHICS
ENG J NY	ENGINEERING JOURNAL OF THE AMERICAN INSTITUTE OF STEEL CONSTRUCTION
ENG MATER DES	ENGINEERING MATERIALS AND DESIGN
ENG MINING J	ENGINEERING AND MINING JOURNAL
ENGINEERING	ENGINEERING
ENGL HIST REV	ENGLISH HISTORICAL REVIEW
ENGL J	ENGLISH JOURNAL
ENTOMOL EXP APPL	ENTOMOLOGIA EXPERIMENTALIS ET APPLICATA
ENTOMOL SCAND	ENTOMOLOGICA SCANDINAVICA
ENVIRON BEHAV	ENVIRONMENT AND BEHAVIOR
ENVIRON CONSERV	ENVIRONMENTAL CONSERVATION
ENVIRON ENTOMOL	ENVIRONMENTAL ENTOMOLOGY
ENVIRON HEALTH PERSP	ENVIRONMENTAL HEALTH PERSPECTIVES
ENVIRON LETT	ENVIRONMENTAL LETTERS
ENVIRON PHYSIOL BIOC	ENVIRONMENTAL PHYSIOLOGY AND BIOCHEMISTRY
ENVIRON PLAN	ENVIRONMENT & PLANNING
ENVIRON POLLUT	ENVIRONMENTAL POLLUTION
ENVIRON RES	ENVIRONMENTAL RESEARCH
ENVIRON SCI TECHNOL	ENVIRONMENTAL SCIENCE & TECHNOLOGY
ENVIRONMENT	ENVIRONMENT
ENZYME	ENZYME
EOS T AM GEOPHYS UN	EOS TRANSACTIONS. AMERICAN GEOPHYSICAL UNION
EPILEPSIA	EPILEPSIA AND SUPPLEMENT
ERDOL KOHLE ERDGAS P	ERDOL UND KOHLE ERDGAS PETROCHEMIE VEREINIGT MIT BRENNSTOFF-CHEMIE
ERG ANAT ENTWICKLU	ERGEBNISSE DER ANATOMIE UND ENTWICKLUNGSGESCHICTE
ERG INN MED KINDERHK	ERGEBNISSE DER INNERN MEDIZIN UND KINDERHEILKUNDE
ERG PHYSIOL BIOL CH	ERGEBNISSE DER PHYSIOLOGIE BIOLOGISCHEN CHEMIE UND EXPERIMENTELLEN PHARMAKOLOGIE
ERGONOMICS	ERGONOMICS
ERICSSON REV	ERICSSON REVIEW
ERICSSON TECH	ERICSSON TECHNICS
ESSAYS BIOCHEM	ESSAYS IN BIOCHEMISTRY
ESSAYS CHEM	ESSAYS IN CHEMISTRY
ESSAYS TOXICOL	ESSAYS IN TOXICOLOGY
ESTUA COASTAL MAR SC	ESTUARINE AND COASTAL MARINE SCIENCE
ESTUD SOC CENTROAMER	ESTUDIOS SOCIALES CENTROAMERICANOS
ETC-REV GEN SEMANTIC	ETC-REVIEW OF GENERAL SEMANTICS
ETHICS	ETHICS. AN INTERNATIONAL JOURNAL OF SOCIAL POLITICAL AND LEGAL PHILOSOPHY
ETHNOLOGY	ETHNOLOGY
ETHNOMUSICOLOGY	ETHNOMUSICOLOGY
ETHNOS	ETHNOS
ETUD INT	ETUDES INTERNATIONALES
ETUD PHIL	ETUDES PHILOSOPHIQUES
ETUD SLAV EST-EUROP	ETUDES SLAVES ET EST-EUROPEENNES/SLAVIC AND EAST-EUROPEAN STUDIES
EUPHYTICA	EUPHYTICA
EUR ARCH	EUROPA ARCHIV- ZEITSCHRIFT FUR INTERNATIONALE POLITIK
EUR BUS	EUROPEAN BUSINESS
EUR COMMUNITY	EUROPEAN COMMUNITY
EUR ECON REV	EUROPEAN ECONOMIC REVIEW
EUR J APPL PHYSIOL O	EUROPEAN JOURNAL OF APPLIED PHYSIOLOGY AND OCCUPATIONAL PHYSIOLOGY
EUR J BIOCHEM	EUROPEAN JOURNAL OF BIOCHEMISTRY
EUR J CANCER	EUROPEAN JOURNAL OF CANCER
EUR J CARDIOLOGY	EUROPEAN JOURNAL OF CARDIOLOGY
EUR J CLIN INVEST	EUROPEAN JOURNAL OF CLINICAL INVESTIGATION
EUR J CLIN PHARMACOL	EUROPEAN JOURNAL OF CLINICAL PHARMACOLOGY
EUR J FOREST	EUROPEAN JOURNAL OF FOREST PATHOLOGY
EUR J IMMUNOL	EUROPEAN JOURNAL OF IMMUNOLOGY
EUR J MED CHEM-CHIM	EUROPEAN JOURNAL OF MEDICINAL CHEMISTRY-CHIMICA THERAPEUTICA
EUR J OBSTET GYN R B	EUROPEAN JOURNAL OF OBSTETRICS, GYNECOLOGY AND REPRODUCTIVE BIOLOGY
EUR J PHARMACOL	EUROPEAN JOURNAL OF PHARMACOLOGY
EUR J SOC PSYCHOL	EUROPEAN JOURNAL OF SOCIAL PSYCHOLOGY

ABBREVIATION	FULL TITLE
EUR NEUROL	EUROPEAN NEUROLOGY
EUR POLYM J	EUROPEAN POLYMER JOURNAL
EUR STUD REV	EUROPEAN STUDIES REVIEW
EUR SURG RES	EUROPEAN SURGICAL RESEARCH
EURO-SPECTRA	EURO-SPECTRA
EUROPLAST MON	EUROPLASTICS MONTHLY
EVOLUTION	EVOLUTION
EXCEPT CHILD	EXCEPTIONAL CHILDREN
EXP AGR	EXPERIMENTAL AGRICULTURE
EXP BRAIN RES	EXPERIMENTAL BRAIN RESEARCH
EXP CELL RES	EXPERIMENTAL CELL RESEARCH
EXP EYE RES	EXPERIMENTAL EYE RESEARCH
EXP GERONTOL	EXPERIMENTAL GERONTOLOGY
EXP HEMATOL	EXPERIMENTAL HEMATOLOGY
EXP HORT	EXPERIMENTAL HORTICULTURE
EXP MECH	EXPERIMENTAL MECHANICS
EXP MOL PATHOL	EXPERIMENTAL AND MOLECULAR PATHOLOGY
EXP NEUROL	EXPERIMENTAL NEUROLOGY
EXP PARASITOL	EXPERIMENTAL PARASITOLOGY
EXP PATHOL-JENA	EXPERIMENTELLE PATHOLOGIE
EXP REP EQUINE HEA L	EXPERIMENTAL REPORTS OF EQUINE HEALTH LABORATORY
EXPERIENTIA	EXPERIENTIA
EXPLOR ECON HIST	EXPLORATIONS IN ECONOMIC HISTORY
EYE EAR NOSE THROAT	EYE, EAR, NOSE AND THROAT MONTHLY
FAM COORD	FAMILY COORDINATOR
FAM LAW QUART	FAMILY LAW QUARTERLY
FAM PLANNING PERSPEC	FAMILY PLANNING PERSPECTIVES
FAM PROCESS	FAMILY PROCESS
FAO AQUACULT BULL	F. A. O. AQUACULTURE BULLETIN (FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS)
FAO PLANT PROTECT B	F. A. O. PLANT PROTECTION BULLETIN (FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS)
FARADAY DISCUSS CHEM	FARADAY DISCUSSIONS OF THE CHEMICAL SOCIETY
FARM BLDG PROGR	FARM BUILDING PROGRESS
FARM BLDG RES DEV ST	FARM BUILDING RESEARCH & DEVELOPMENT STUDIES
FARM ED PRAT	FARMACO. EDIZIONE PRATICA (UFFICIALE PER GLI ATTI DELLA SOCIETA ITALIANA DI SCIENZE FARMACEUTICHE)
FARMACO ED SCI	FARMACO. EDIZIONE SCIENTIFICA (UFFICIALE PER GLI ATTI DELLA SOCIETA ITALIANA DI SCIENZE FARMACEUTICHE)
FARMAKOL I TOKSIKOL	FARMAKOLOGIYA I TOKSIKOLOGIYA
FDA CONSUM	FDA CONSUMER
FEBS LETT	FEBS LETTERS
FED BAR J	FEDERAL BAR JOURNAL
FED PROBAT	FEDERAL PROBATION
FED PROC	FEDERATION PROCEEDINGS
FEEDSTUFFS	FEEDSTUFFS
FERROELECTRICS	FERROELECTRICS
FERT STERIL	FERTILITY AND STERILITY
FETTE SEIFEN ANSTRIC	FETTE, SEIFEN, ANSTRICHMITTEL VERBUNDEN MIT DER ZEITSCHRIFT DIE ERNAHRUNGSINDUSTRIE
FIBONACCI Q	FIBONACCI QUARTERLY
FIBRE SCI TECH	FIBRE SCIENCE AND TECHNOLOGY
FID NEWS BULL	FID NEWS BULLETIN
FIELDS WITHIN FIELDS	FIELDS WITHIN FIELDS
FINAN DEV	FINANCE & DEVELOPMENT
FINAN EXEC	FINANCIAL EXECUTIVE
FINAN MANAGE	FINANCIAL MANAGEMENT
FINN CHEM LETT	FINNISH CHEMICAL LETTERS
FINSKA KEMISTS MEDD	FINSKA KEMISTSAMFUNDETS MEDDELANDEN
FISH BULL NAT OCEAN	FISHERY BULLETIN OF THE NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION
FISHING NEWS INTERNA	FISHING NEWS INTERNATIONAL
FIZ METAL METALLOVED	FIZIKA METALLOV I METALLOVEDENIE
FIZ TVERD TELA	FIZIKA TVERDOGO TELA
FIZIKA ZEMLI	FIZIKA ZEMLI
FIZIOL RASTENII	FIZIOLOGIYA RASTENII
FLA AGR EXP STA BULL	FLORIDA AGRICULTURAL EXPERIMENT STATIONS BULLETIN
FLA AGR EXP STA CIRC	FLORIDA AGRICULTURAL EXPERIMENT STATIONS CIRCULAR
FLA COOP EXT SERV CI	FLORIDA COOPERATIVE EXTENSION SERVICE CIRCULAR
FLEISCHWIRTSCHAFT	FLEISCHWIRTSCHAFT
FLORA	FLORA
FLUG REV-FLUG INT	FLUG REVUE-FLUGWELT INTERNATIONAL
FLUORIDE	FLUORIDE- OFFICIAL QUARTERLY JOURNAL OF INTERNATIONAL SOCIETY FOR FLUORIDE RESEARCH
FLUSSIGES OBST	FLUSSIGES OBST
FOCUS EXCEPT CHILD	FOCUS ON EXCEPTIONAL CHILDREN
FOLIA BIOL PRAGUE	FOLIA BIOLOGICA (PRAGUE)
FOLIA CLIN INTERN	FOLIA CLINICA INTERNACIONAL
FOLIA ENDOCRINOL JAP	FOLIA ENDOCRINOLOGICA JAPONICA
FOLIA FAC MED U COME	FOLIA FACULTATIS MEDICAE UNIVERSITATIS COMENIANAE BRATISLAVIENSIS
FOLIA HISTOCHIM CYTO	FOLIA HISTOCHEMICA ET CYTOCHEMICA
FOLIA HUMANIST	FOLIA HUMANISTICA
FOLIA MICROBIOL	FOLIA MICROBIOLOGICA
FOLIA OPHTHALMOL JAP	FOLIA OPHTHALMOLOGICA JAPONICA
FOLIA PHONIAT	FOLIA PHONIATRICA
FOLIA PRIMATOL	FOLIA PRIMATOLOGICA (INTERNATIONAL JOURNAL OF PRIMATOLOGY)
FOLIA PSYCHIAT NEU J	FOLIA PSYCHIATRICA ET NEUROLOGICA JAPONICA
FONDERIE	FONDERIE
FOOD CANADA	FOOD IN CANADA
FOOD COSMET TOXICOL	FOOD AND COSMETICS TOXICOLOGY
FOOD DRUG COSMET LAW	FOOD, DRUG, COSMETIC LAW JOURNAL
FOOD ENG	FOOD ENGINEERING
FOOD MFR	FOOD MANUFACTURE
FOOD PROD DEV	FOOD PRODUCT DEVELOPMENT
FOOD PRODUCTION MANA	FOOD PRODUCTION/MANAGEMENT
FOOD TECHNOL AUST	FOOD TECHNOLOGY IN AUSTRALIA
FOOD TECHNOL-CHICAGO	FOOD TECHNOLOGY
FOOD TRADE REV	FOOD TRADE REVIEW
FORBES MAG	FORBES MAGAZINE
FORDHAM LAW REV	FORDHAM LAW REVIEW
FOREIGN AFF	FOREIGN AFFAIRS
FOREIGN AGR	FOREIGN AGRICULTURE
FOREIGN LANG ANN	FOREIGN LANGUAGE ANNALS
FOREIGN POLICY	FOREIGN POLICY
FORENSIC QUART	FORENSIC QUARTERLY
FORENSIC SCI	FORENSIC SCIENCE
FOREST CHRON	FORESTRY CHRONICLE
FOREST SCI	FOREST SCIENCE
FORESTRY	FORESTRY
FORO INTERNACIONAL	FORO INTERNACIONAL
FORSCH INGENIEURWES	FORSCHUNG IM INGENIEURWESEN
FORSTWISS CENTRALBL	FORSTWISSENSCHAFTLICHES CENTRALBLATT
FORTSCHR GEB GYNAEKO	FORSCHRITTE DER GEBURSHILFE UND GYNAEKOLOGIE
FORTSCHR GEB RONTGEN	FORTSCHRITTE AUF DEM GEBIETE DER RONTGENSTRAHLEN UND DER NUKLEARMEDIZIN

ABBREVIATION	FULL TITLE
FORTSCHR MED	FORTSCHRITTE DER MEDIZIN
FORTSCHR NEUROL	FORTSCHRITTE DER NEUROLOGIE UND PSYCHIATRIE UND IHRER GRENZGEBIETE
FORTSCHR PHYS	FORTSCHRITTE DER PHYSIK
FORTSCHR VET	FORTSCHRITTE DER VETERINARMEDIZIN
FORTUNE	FORTUNE
FORUM	FORUM
FOUND CENTER INF Q	FOUNDATION CENTER INFORMATION QUARTERLY
FOUND LANG	FOUNDATIONS OF LANGUAGE
FOUND PHYS	FOUNDATIONS OF PHYSICS
FR HISTORICA STUDIES	FRENCH HISTORICAL STUDIES
FREQUENZ	FREQUENZ
FRESEN Z ANALYT CHEM	FRESENIUS ZEITSCHRIFT FUR ANALYTISCHE CHEMIE
FRESHWATER BIOL	FRESHWATER BIOLOGY
FRONTIERS LIBRARIAN	FRONTIERS OF LIBRARIANSHIP SYRACUSE UNIVERSITY
FRUITS	FRUITS
FUEL	FUEL
FUJITSU SCI TECH J	FUJITSU SCEINTIFIC & TECHNICAL JOURNAL
FUTURES	FUTURES
FUTURIST	FUTURIST
GALVANOTECHNIK	GALVANOTECHNIK
GANN	GANN
GARDEN J	GARDEN JOURNAL
GARTENBAUWISSENSCHAF	GARTENBAUWISSENSCHAFT
GASLINI	GASLINI
GASTROENTEROLOGY	GASTROENTEROLOGY
GASTROINTESTINAL END	GASTROINTESTINAL ENDOSCOPY
GAZ MED FRANCE	GAZETTE MEDICALE DE FRANCE
GAZZ CHIM ITALIAN	GAZZETTA CHIMICA ITALIANA
GEBURTSH FRAUENHEILK	GEBURTSHILFE UND FRAUENHEILKUNDE
GEC J SCI TECHNOL	GEC JOURNAL OF SCIENCE AND TECHNOLOGY
GEDRAG-TIJDS VOO PSY	GEDRAG-TIJDSCHRIFT VOOR PSYCHOLOGIE
GEGEN GES STAAT ERZ	GEGENWARTSKUNDE. GESELLSCHAFT STAAT ERZIEHUNG
GEN COMP ENDOCR	GENERAL AND COMPARATIVE ENDOCRINOLOGY
GEN LINGUIST	GENERAL LINGUISTICS
GEN RELAT GRAVITY J	GENERAL RELATIVITY AND GRAVITATION JOURNAL
GEN SYSTEMS	GENERAL SYSTEMS
GENET IBER	GENETICA IBERICA
GENET POL	GENETICA POLONICA
GENET PSYCHOL MONOGR	GENETIC PSYCHOLOGY MONOGRAPHS
GENET RES	GENETICAL RESEARCH
GENETICA	GENETICA
GENETICS	GENETICS
GENETIKA*	GENETIKA
GEO AGR EXP ST BULL	GEORGIA AGRICULTURAL EXPERIMENT STATION RESEARCH BULLETIN
GEO AGR EXP ST RE RE	GEORGIA AGRICULTURAL EXPERIMENT STATION RESEARCH REPORT
GEOCHEM INT USSR*	GEOCHEMISTRY INTERNATIONAL
GEOCHIM COSMOCHEM AC	GEOCHIMICA ET COSMOCHIMICA ACTA
GEOCHIMICA	GEOCHIMICA
GEODERMA	GEODERMA- AN INTERNATIONAL JOURNAL OF SOIL SCIENCE
GEOEXPLORATION	GEOEXPLORATION
GEOFORUM	GEOFORUM
GEOG ANN B	GEOGRAFISKA ANNALER B. HUMAN GEOGRAPHY
GEOGR ANAL	GEOGRAPHICAL ANALYSIS
GEOGR J	GEOGRAPHICAL JOURNAL

J RHEUMATOL	JOURNAL OF RHEUMATOLOGY
J RISK INSURANCE	JOURNAL OF RISK AND INSURANCE
J ROY AGR SOC ENGL	JOURNAL OF THE ROYAL AGRICULTURAL SOCIETY OF ENGLAND
J ROY ASTRON SOC CAN	JOURNAL OF THE ROYAL ASTRONOMICAL SOCIETY OF CANADA
J ROY SOC NEW ZEAL	JOURNAL OF THE ROYAL SOCIETY OF NEW ZEALAND
J ROY STAT SOC A GEN	JOURNAL OF THE ROYAL STATISTICAL SOCIETY. SERIES A. GENERAL
J ROY STAT SOC B MET	JOURNAL OF THE ROYAL STATISTICAL SOCIETY. SERIES B. METHODOLOGICAL
J ROY STAT SOC C APP	JOURNAL OF THE ROYAL STATISTICAL SOCIETY. SERIES C. APPLIED STATISTICS
J S AFR CHEM I	JOURNAL OF THE SOUTH AFRICAN CHEMICAL INSTITUTE
J S AFR I MIN METAL	JOURNAL OF THE SOUTH AFRICAN INSTITUTE OF MINING AND METALLURGY

ABBREVIATION	FULL TITLE
J S AFR VET ASS	JOURNAL OF THE SOUTH AFRICAN VETERINARY ASSOCIATION
J S AFR WILDLI MAN A	JOURNAL OF THE SOUTHERN AFRICAN WILDLIFE MANAGEMENT ASSOCIATION
J S CAROLINA MED ASS	JOURNAL OF THE SOUTH CAROLINA MEDICAL ASSOCIATION
J SAFETY RES	JOURNAL OF SAFETY RESEARCH
J SCHOOL HEALTH	JOURNAL OF SCHOOL HEALTH
J SCHOOL PSYCHOL	JOURNAL OF SCHOOL PSYCHOLOGY
J SCI AGR SOC FINL	JOURNAL OF THE SCIENTIFIC AGRICULTURAL SOCIETY OF FINLAND
J SCI FOOD AGR	JOURNAL OF THE SCIENCE OF FOOD AND AGRICULTURE
J SCI IND RES INDIA	JOURNAL OF SCIENTIFIC AND INDUSTRIAL RESEARCH
J SCI LAB DENISON U	JOURNAL OF THE SCIENTIFIC LABORATORIES. DENISON UNIVERSITY
J SCI STUD RELIGION	JOURNAL FOR THE SCIENTIFIC STUDY OF RELIGION
J SCI TECHNOLOGY	JOURNAL OF SCIENCE & TECHNOLOGY
J SEDIMENT PETROL	JOURNAL OF SEDIMENTARY PETROLOGY
J SEX RESEARCH	JOURNAL OF SEX RESEARCH
J SHIP RESEARCH	JOURNAL OF SHIP RESEARCH
J SIGNALAUFZEICHNUNG	JOURNAL FUR SIGNALAUFZEICHNUNGSMATERIALIEN
J SMALL ANIMAL PRACT	JOURNAL OF SMALL ANIMAL PRACTICE
J SMPTE	J SMPTE
J SOC AMERICANISTES	JOURNAL DE LA SOCIETE DES AMERICANISTES
J SOC ARCHITECT HIST	JOURNAL OF THE SOCIETY OF ARCHITECTURAL HISTORIANS
J SOC COSMET CHEM	JOURNAL OF THE SOCIETY OF COSMETIC CHEMISTS
J SOC DAIRY TECH	JOURNAL OF THE SOCIETY OF DAIRY TECHNOLOGY
J SOC DYERS COLOUR	JOURNAL OF THE SOCIETY OF DYERS AND COLOURISTS
J SOC PSYCHOL	JOURNAL OF SOCIAL PSYCHOLOGY
J SOCIAL HISTORY	JOURNAL OF SOCIAL HISTORY
J SOCIAL ISSUES	JOURNAL OF SOCIAL ISSUES
J SOCIAL POLICY	JOURNAL OF SOCIAL POLICY
J SOIL SCIENCE	JOURNAL OF SOIL SCIENCE
J SOIL WATER CONSERV	JOURNAL OF SOIL AND WATER CONSERVATION
J SOLID STATE CHEM	JOURNAL OF SOLID STATE CHEMISTRY
J SOLUT CHEM	JOURNAL OF SOLUTION CHEMISTRY
J SOUND VIBRATION	JOURNAL OF SOUND AND VIBRATION
J SOUTHEAST ASIA STU	JOURNAL OF SOUTHEAST ASIAN STUDIES
J SOUTHERN HISTORY	JOURNAL OF SOUTHERN HISTORY
J SPACECRAFT ROCKETS	JOURNAL OF SPACECRAFT AND ROCKETS
J SPEC EDUC MENT RET	JOURNAL FOR SPECIAL EDUCATORS OF THE MENTALLY RETARDED
J SPECIAL EDUCATION	JOURNAL OF SPECIAL EDUCATION
J SPEECH HEARING DIS	JOURNAL OF SPEECH AND HEARING DISORDERS
J SPEECH HEARING RES	JOURNAL OF SPEECH AND HEARING RESEARCH
J SPORT MED PHYS FIT	JOURNAL OF SPORTS MEDICINE AND PHYSICAL FITNESS
J STATIST PHYS	JOURNAL OF STATISTICAL PHYSICS
J STEROID BIOCHEM	JOURNAL OF STEROID BIOCHEMISTRY
J STORED PROD RES	JOURNAL OF STORED PRODUCTS RESEARCH
J STRUCT CHEM-USSR*	JOURNAL OF STRUCTURAL CHEMISTRY
J STRUCT DIV ASCE	JOURNAL OF THE STRUCTURAL DIVISION- PROCEEDINGS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS
J STRUCT LEARNING	JOURNAL OF STRUCTURAL LEARNING
J STRUCT MECHANICS	JOURNAL OF STRUCTURAL MECHANICS
J SUBMICROSC CYTOL	JOURNAL OF SUBMICROSCOPIC CYTOLOGY
J SURG ONCOL	JOURNAL OF SURGICAL ONCOLOGY
J SURG RES	JOURNAL OF SURGICAL RESEARCH
J SURV MAPP DIV-ASCE	JOURNAL OF THE SURVEYING AND MAPPING DIVISION- PROCCEDINGS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS
J SYMBOLIC LOGIC	JOURNAL OF SYMBOLIC LOGIC
J SYN ORG CHEM JAP	JOURNAL OF SYNTHETIC ORGANIC CHEMISTRY, JAPAN
J SYSTEMS MANAGEMENT	JOURNAL OF SYSTEMS MANAGEMENT
J TAXATION	JOURNAL OF TAXATION
J TEACHER EDUCATION	JOURNAL OF TEACHER EDUCATION
J TENNESSEE MED ASS	JOURNAL OF THE TENNESSEE MEDICAL ASSOCIATION
J TEST EVAL	JOURNAL OF TESTING AND EVALUATION
J TEXTILE INST	JOURNAL OF THE TEXTILE INSTITUTE
J TEXTURE STUDIES	JOURNAL OF TEXTURE STUDIES
J THANATOL	JOURNAL OF THANATOLOGY
J THEOR BIOL	JOURNAL OF THEORETICAL BIOLOGY
J THEOR SOC BEHAV	JOURNAL FOR THE THEORY OF SOCIAL BEHAVIOUR
J THERM ANAL	JOURNAL OF THERMAL ANALYSIS
J THORAC CARDIOV SUR	JOURNAL OF THORACIC AND CARDIOVASCULAR SURGERY
J THOUGHT	JOURNAL OF THOUGHT
J TOKYO U FISH	JOURNAL OF THE TOKYO UNIVERSITY OF FISHERIES
J TOWN PLANNING I	JOURNAL OF TOWN PLANNING INSTITUTE
J TRANSP ECON POLICY	JOURNAL OF TRANSPORT ECONOMICS AND POLICY
J TRAUMA	JOURNAL OF TRAUMA
J TROP GEOGR	JOURNAL OF TROPICAL GEOGRAPHY
J TROP MED HYG	JOURNAL OF TROPICAL MEDICINE AND HYGIENE
J ULTRASTRUCT RES	JOURNAL OF ULTRASTRUCTURE RESEARCH
J URBAN ECON	JOURNAL OF URBAN ECONOMICS
J URBAN LAW	JOURNAL OF URBAN LAW
J URBAN PLAN RES	JOURNAL OF THE URBAN PLANNING AND DEVELOPMENT DIVISION-PROCEEDINGS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS
J UROL	JOURNAL OF UROLOGY
J UROL NEPHROL	JOURNAL D' UROLOGIE ET DE NEPHROLOGIE
J VAC SCI TECHNOL	JOURNAL OF VACUUM SCIENCE AND TECHNOLOGY
J VERB LEARN VERB BE	JOURNAL OF VERBAL LEARNING AND VERBAL BEHAVIOR
J VIROL	JOURNAL OF VIROLOGY
J VOCAT BEHAV	JOURNAL OF VOCATIONAL BEHAVIOR
J VOLUNT ACTION RES	JOURNAL OF VOLUNTARY ACTION RESEARCH
J WATER POLLUT CON E	JOURNAL OF THE WATER POLLUTION CONTROL FEDERATION
J WATERWAYS HARBORS	JOURNAL OF THE WATERWAYS, HARBORS AND COASTAL ENGINEERING DIVISION (PROCEEDINGS OF THE AMERICAN SOCIETY OF CIVIL ENGINEERS)
J WILDLIFE DIS	JOURNAL OF WILDLIFE DISEASES
J WILDLIFE MANAGE	JOURNAL OF WILDLIFE MANAGEMENT
J WORLD TRADE LAW	JOURNAL OF WORLD TRADE LAW
J YOUTH ADOLESCENCE	JOURNAL OF YOUTH AND ADOLESCENCE
J ZOO ANIM MED	JOURNAL OF ZOO ANIMAL MEDICINE
J ZOOL-LONDON	JOURNAL OF ZOOLOGY (PROCEEDINGS OF THE ZOOLOGICAL SOCIETY OF LONDON)

JOURNAL CITATION REPORTS®

Journal Ranking Package

Section 1: Alphabetic list of cited journals 1974; 22 pages
Section 2: Journals ranked by total citations in 1974; 22 pages
Section 3: Journals ranked by impact factor in 1974; 21 pages
Section 4: Journals ranked by immediacy index in 1974; 20 pages
Section 5: Journals ranked by source items published in 1974; 22 pages
Section 6: Journals ranked by 1974 citations of their 1972 and 1973 articles; 21 pages

Citing Journal Package

Citing journals listed alphabetically by journal title (abbreviation), with subentry listings of the journals they cited in 1974; 640 pages

Cited Journal Package

Cited journals listed alphabetically by journal title (abbreviation), with subentry listings of the journals that cited them in 1974; 490 pages

Journal Citation Reports®—1975

JOURNAL RANKING PACKAGE

The Institute for Scientific Information invites you to tour its facilities during your Bicentennial visit to Philadelphia.

Carpenters' Hall—where the First Continental Congress met in 1774—from ISI

ISI® welcomes the many visitors who will be coming to Philadelphia in 1975-1976 for the nation's Bicentennial.

While you're in the historic area, we hope you'll use the opportunity to tour ISI—we're located just a block from Independence Hall and the Liberty Bell. We'd like to show you how *Current Contents*®, the *Science Citation Index*®, and a variety of other information services are produced.

At ISI you'll view an orientation film, take a guided tour through important work areas, and get a chance to ask ISI personnel about our operations and services.

ISI tours will start at 2 p.m. every Tuesday and Thursday (except holidays) beginning April 1, 1975. Because the number of places on each tour must be limited, tours will be run on a *reservation only* basis.

Avoid disappointment—make your reservations now. Use the coupon or phone Estelle Fox at ISI.

©1976 ISI

Please accept my reservation(s) for the *ISI*® tour at 2 p.m. on the following date: _____ .

The number in my party will be _____ .

Tours are designed for researchers, librarians, and information scientists. They are not appropriate for anyone below high-school age.

Name _____

Title _____ Tel. _____

Organization _____

City _____ State _____

Zip _____ Country _____

All reservations will be confirmed.

417a

ISI® **Institute for Scientific Information**® 325 Chestnut Street, Philadelphia, Pa. U.S.A. 19106, Telephone: (215) 923-3300, Extension 359

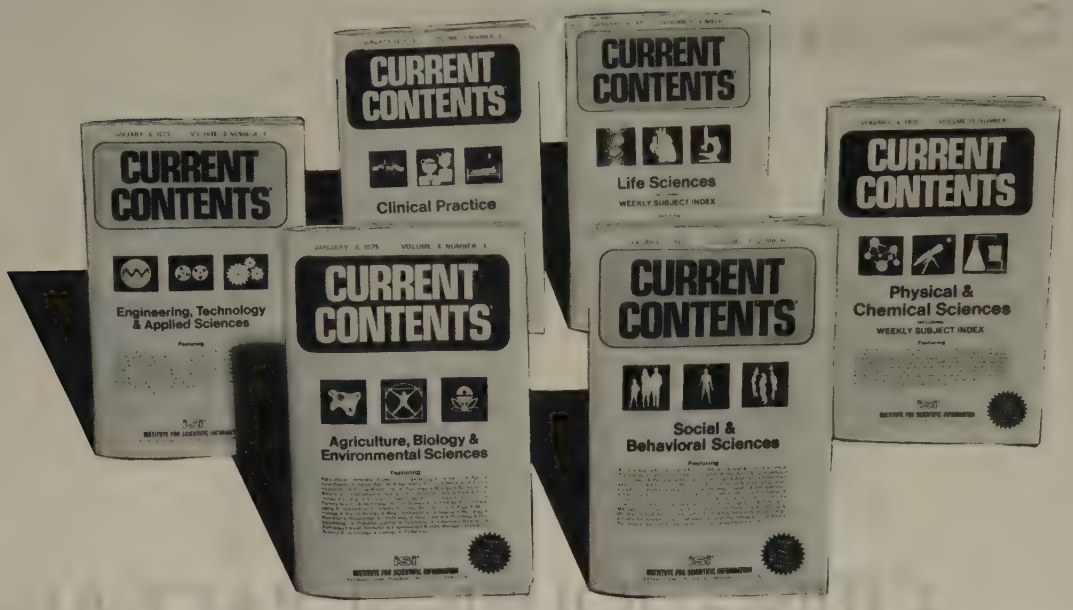
Journal Citation Reports®—1975

CITING JOURNAL PACKAGE

the most widely used scientific information system in the world



Try any edition free for 4 weeks.

Nearly 200,000 professionals of all types use the *Current Contents*® system every week to locate and obtain new journal articles relevant to their work. And they've got good reasons.

Current Contents is the most comprehensive, least complicated way to make sure you learn of new developments in your field while they're still new. Just an hour a week spent scanning any edition of *Current Contents* lets you sort through everything that's published in a thousand or more journals. With *CC*® it's easy to pick out just those articles you want to read. Without handling the journals. Without increasing your journal subscription expenses.

Find out why so many people like you use *Current Contents*. Get more information and a free 4-week subscription by completing the coupon.

©1975 ISI

Please start my free 4-week subscription to the *Current Contents*® edition checked below:
